3. SETUP AND INSTALLATION

To install and use the TechSpark Studio digital service manual, follow these steps:

1. **System Requirements:** Ensure your computer meets the minimum requirements: Windows XP or higher, or MAC OSX 10.4 or higher.
2. **Insert CD-ROM:** Place the TechSpark Studio CD-ROM into your computer's optical drive.
3. **Run Installer:** If the installer does not launch automatically, navigate to the CD-ROM drive in 'My Computer' (Windows) or 'Finder' (MAC) and double-click the setup file (e.g., 'setup.exe' or 'install.app').
4. **Follow On-Screen Prompts:** Proceed through the installation wizard, accepting the license agreement and choosing the installation directory if prompted.
5. **Launch Software:** Once installation is complete, launch the TechSpark Studio application from your desktop shortcut or Start Menu/Applications folder.

The program runs directly on your computer, eliminating the need for an internet connection to access the manual content after installation.

4. OPERATING INSTRUCTIONS

The TechSpark Studio software provides an intuitive interface for accessing vehicle information:

- **Navigation:** Use the digital flipping book interface to browse through pages as you would a physical manual.
- **Search Function:** Utilize the search bar to find specific keywords, procedures, or component names. This feature significantly reduces the time spent locating information.
- **Bookmarks:** To save a page for quick access later, use the bookmark feature. This is useful for frequently referenced sections or ongoing projects.
- **Zoom and Pan:** For detailed views of diagrams, illustrations, or small text, use the integrated zoom and pan tools.
- **Printing:** Select the print option to output specific pages or entire sections. This allows for a physical copy that can be used in a workshop environment without risking damage to your computer.
