Ariete 993 Single Electric Hot Plate Instruction Manual

Model: 993

1. Important Safety Instructions

Please read all instructions carefully before using the appliance and retain them for future reference. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Ensure the voltage indicated on the appliance corresponds to your local mains voltage before connecting.
- Do not immerse the appliance, cord, or plug in water or any other liquid.
- Always place the hot plate on a stable, heat-resistant, and dry surface, away from flammable materials.
- Do not touch hot surfaces. Use handles or knobs.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from the outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner. Contact customer service for examination, repair, or adjustment.
- The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.
- Do not use outdoors.
- Do not let the cord hang over the edge of a table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.
- Always attach the plug to the appliance first, then plug the cord into the wall outlet. To disconnect, turn any control to "OFF", then remove the plug from the wall outlet.
- Do not use the appliance for other than intended use.

2. Product Overview

The Ariete 993 Single Electric Hot Plate is a compact and portable cooking solution, ideal for various settings such as travel, camping, or office use. It features a high-quality cast iron heating plate for efficient cooking and heat retention.

Key Features:

- **High-Quality Cast Iron Plate:** Ensures rapid heating and excellent heat retention.
- **1500W Power:** Provides efficient cooking performance.
- **Stainless Steel Structure:** Durable and easy to clean.
- **Temperature Control Knob:** Allows precise adjustment of heating levels.
- **Power Indicator Light:** Illuminates when the hot plate is active.
- **Compact Design:** Portable and suitable for various environments.

3. Setup and First Use

Unpacking:

1. Carefully remove the hot plate from its packaging.
2. Remove all packaging materials, stickers, and labels.
3. Inspect the appliance for any signs of damage. Do not use if damaged.

Placement:

- Place the hot plate on a flat, stable, heat-resistant, and dry surface.
- Ensure there is adequate ventilation around the appliance. Maintain a minimum distance of 10 cm from walls or other objects.
- Keep away from water sources, sinks, and flammable materials like curtains or paper.

Initial Burn-off:

During the first use, a small amount of smoke and odor may be emitted. This is normal and will dissipate quickly. It is recommended to operate the hot plate at its maximum setting for approximately 5-10 minutes in a well-ventilated area without any cookware on it to burn off any manufacturing residues.

4. Operating Instructions

Connecting to Power:

1. Ensure the temperature control knob is set to the "OFF" position.
2. Plug the power cord into a suitable 240V AC electrical outlet.

Cooking:

1. Place your cookware (pots or pans with flat bottoms) centrally on the cast iron heating plate. Ensure the cookware diameter is appropriate for the 188mm plate.
2. Turn the temperature control knob clockwise to your desired heat setting. The power indicator light will illuminate, indicating the hot plate is heating.
3. The hot plate will cycle on and off to maintain the selected temperature. The indicator light will turn off when the desired temperature is reached and turn back on when heating resumes.
4. Monitor your cooking. The cast iron plate retains heat well, so you may need to adjust the setting lower than expected.
5. After cooking, turn the temperature control knob counter-clockwise to the "OFF" position. The power indicator light will turn off.
6. Unplug the appliance from the wall outlet and allow it to cool completely before cleaning or storing.

5. Maintenance and Cleaning

Regular cleaning and maintenance will ensure the longevity and optimal performance of your Ariete 993 Single Electric Hot Plate.

Before Cleaning:

- Always unplug the hot plate from the power outlet.
- Allow the appliance to cool down completely before attempting to clean it. The cast iron plate retains heat for a significant period.

Cleaning the Hot Plate:

1. Wipe the stainless steel body with a soft, damp cloth. For stubborn stains, a mild detergent can be used, followed by wiping with a clean, damp cloth.
2. For the cast iron heating plate, gently scrape off any food residues with a plastic or wooden scraper once cooled.
3. Wipe the heating plate with a damp cloth. For tougher stains, a small amount of non-abrasive cleaner designed for cooktops can be used, then wipe thoroughly with a clean, damp cloth.
4. Ensure all parts are completely dry before plugging the appliance back in or storing it.

Do NOT:

- Immerse the hot plate, power cord, or plug in water or any other liquid.
- Use abrasive cleaners, scouring pads, or metal utensils on any part of the appliance, as this can damage the surfaces.

6. Troubleshooting

If you encounter issues with your Ariete 993 Single Electric Hot Plate, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Hot plate does not heat up.	Not plugged in. Power outlet is not working. Temperature knob is set to "OFF". Appliance malfunction.	Ensure the power cord is securely plugged into a working outlet. Test the outlet with another appliance. Turn the temperature knob to a desired heat setting. Contact customer support.
Indicator light is off, but hot plate is still warm.	Normal operation (thermostat cycling). Residual heat from cast iron plate.	This is normal. The hot plate cycles to maintain temperature. The cast iron plate retains heat for a long time after being turned off. Allow to cool completely.
Smoke or odor during first use.	Manufacturing residues burning off.	This is normal for initial use. Operate in a well-ventilated area for 5-10 minutes.

If the problem persists after trying these solutions, please contact Ariete customer support.
