Play-Doh 29413

Play-Doh Modeling Compound 10-Pack Instruction Manual

Model: 29413

Introduction

This manual provides essential information for the safe and effective use of your Play-Doh Modeling Compound 10-Pack. This product is designed to encourage creative play and sensory development for children aged 2 years and up. Please read all instructions carefully before use.

Safety Information

Notice to Parents: Contains Wheat.
Play-Doh modeling compound is non-toxic and made primarily with wheat, water, and salt. It undergoes rigorous testing to meet or exceed safety standards. While non-toxic, it is not intended for consumption. Adult supervision is recommended during play, especially for younger children.
In case of accidental ingestion, consult a medical professional if concerns arise.

What's in the Box

Your Play-Doh Modeling Compound 10-Pack includes:

- Ten (10) 2-ounce cans of Play-Doh modeling compound in assorted colors: red, orange, yellow, green, teal, blue, purple, pink, black, and white.

Setup

1. Unpack the Play-Doh 10-pack from its packaging.
2. Remove the lid from each individual Play-Doh can. The compound is ready for immediate use.

Operating Instructions

Play-Doh modeling compound is designed for creative expression through shaping, molding, and sculpting. Here are some basic instructions:

1. Basic Molding and Shaping

- **Kneading:** Begin by kneading the Play-Doh in your hands to soften it. This makes it more pliable and easier to work with.
- **Rolling:** Use your hands or a rolling tool to flatten the compound into sheets or roll it into coils.
- **Shaping:** Pinch, pull, twist, and press the Play-Doh to form various shapes, figures, or objects.
- **Cutting:** Use child-safe plastic tools or cookie cutters to cut out shapes from flattened Play-Doh.

2. Mixing Colors

You can combine different colors of Play-Doh to create new hues or marbled effects. Simply knead two or more colors together until they blend to your desired extent.

Image: A child's hand interacting with several pieces of Play-Doh in different colors, demonstrating the compound's texture and pliability.

3. Creative Examples

The Play-Doh compound allows for a wide range of creations. Examples include:

- Sculpting animals, food items, or abstract shapes.
- Creating colorful scenes or landscapes.
- Using the compound for educational activities like forming letters or numbers.

Maintenance

1. Storing Play-Doh

To maintain the compound's softness and prevent it from drying out, always store Play-Doh in its original airtight container with the lid securely closed after each use. Store at room temperature.

2. Reviving Dry Play-Doh

If Play-Doh begins to dry out, a small amount of water can help restore its pliability. Add a few drops of water to the compound and knead it thoroughly. Repeat this process until the desired consistency is achieved. Avoid adding too much water at once, as this can make the compound sticky.

Troubleshooting

Issue: Play-Doh is too dry or hard.

Solution: Refer to the "Reviving Dry Play-Doh" section under Maintenance. Gradually add small amounts of water and knead until the compound softens.

Issue: Play-Doh is sticking to surfaces or clothing.

Solution: For most surfaces, allow the Play-Doh to dry completely, then scrape it off. For clothing, allow it to dry, then brush it off. If residue remains, wash with warm water and soap.

Specifications

- **Product Dimensions:** 6.14 x 10.63 x 2.68 inches
- **Item Weight:** 1.56 pounds
- **Item Model Number:** 29413
- **Manufacturer Recommended Age:** 24 months and up
- **Individual Can Size:** 2 ounces (56 grams)
- **Primary Ingredients:** Wheat, water, salt
