Sunbeam 32610005

Sunbeam Classic Steam Iron Instruction Manual

Model: 32610005

Brand: Sunbeam

PRODUCT OVERVIEW

The Sunbeam Classic 1200W Steam Iron is designed for efficient and easy garment care. Its powerful Shot of Steam feature provides an extra burst of steam to help smooth out stubborn wrinkles on both flat surfaces and vertically on hanging garments. The integrated anti-drip system prevents water leakage, ensuring mess-free ironing. This iron offers 5 fabric settings and 3 steam select settings, allowing for versatile use across different materials. The durable non-stick soleplate surface glides smoothly over fabrics, making wrinkle removal quick and effective. For added safety and peace of mind, the iron features a 3-way motion smart auto-off function that automatically shuts off the unit if left unattended or in an improper position.

KEY FEATURES

- **MORE POWER:** Classic Steam Iron comes equipped with 1200 Watts of power for quick heating.
- **POWERFUL SHOT OF STEAM FEATURE:** works horizontally or vertically for hanging garments, upholstery, or drapery.

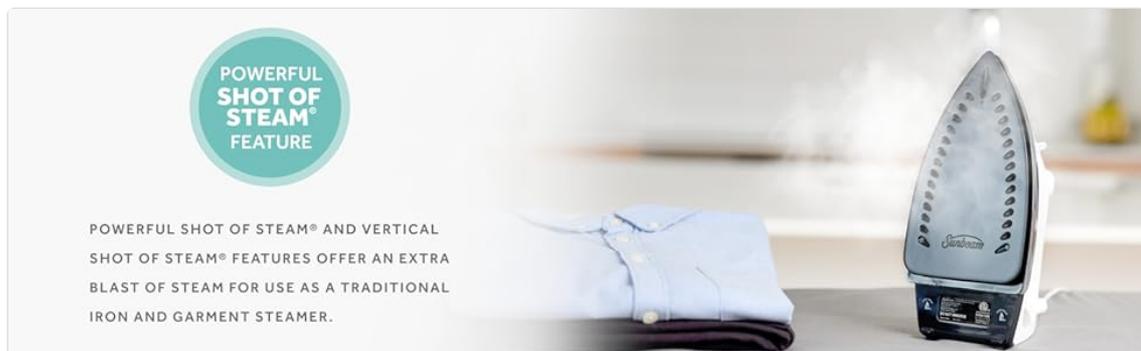

Image: The iron's powerful shot of steam feature, effective for both horizontal and vertical steaming.

- **SPRAY MIST FEATURE:** the spray mist feature helps smooth out even the toughest wrinkles.

SPRAY MIST FEATURE

Image: The convenient spray mist feature helps tackle stubborn wrinkles.

- **NON-STICK SOLEPLATE:** mid-size nonstick soleplate glides smoothly across fabrics.

NON-STICK COATED SOLEPLATE

Image: The durable non-stick soleplate ensures smooth gliding over fabrics.

- **AUTO-SHUT OFF:** equipped with a 30 minute auto-off feature for added safety and peace of mind.

Image: The 3-way motion smart auto-off feature enhances safety by turning off the iron when idle.

- **EASY TO MANEUVER:** the 8-foot 360° swivel cord allows for freedom of movement while ironing.

Image: The 8-foot 360° swivel cord provides flexibility during ironing.

- **NO LEAKS, NO WORRY:** water tank 170ml equipped with an Anti-Drip system for mess-free ironing.

Image: The easy-view water tank and anti-drip system ensure mess-free operation.

- **ACCURATE PRECISION:** precision tip gets in between buttons, lapels and around collars when using iron for clothes.

Image: The precision tip allows for accurate ironing around buttons and collars.

SETUP AND FIRST USE

Filling the Water Tank

Before using the steam function, ensure the iron is unplugged. Open the water fill cover located on the top of the iron. Fill the water tank with distilled water up to the 'Max Fill' line. Using distilled water helps prevent mineral buildup and extends the life of your iron. Close the water fill cover securely before plugging in the iron.

EASY VIEW WATER TANK

Image: The transparent water tank allows for easy monitoring of the water level.

Temperature and Fabric Settings

Plug the iron into a suitable electrical outlet. Turn the temperature dial to the desired fabric setting (e.g., Linen, Cotton, Wool, Silk, Synthetic). The iron will begin to heat up. Wait for the indicator light to turn off, signaling that the iron has reached the selected temperature.

Image: Select the appropriate fabric setting for optimal ironing results.

OPERATING INSTRUCTIONS

Ironing with Steam

Once the iron has reached the desired temperature, you can activate the steam function. For continuous steam, adjust the steam control slider to the desired steam level. For a powerful burst of steam, press the 'Shot of Steam' button. This feature is effective for removing stubborn wrinkles on flat surfaces or for vertical steaming of hanging garments.

Image: Ironing a shirt with the Sunbeam Classic Steam Iron.

Vertical Steaming

To use the vertical steam feature, hold the iron upright, close to the hanging garment. Press the 'Shot of Steam' button repeatedly to release bursts of steam. This is ideal for refreshing clothes, drapes, or upholstery without needing an ironing board.

VERTICAL SHOT OF STEAM® FEATURE

Image: The iron can be used for vertical steaming on hanging garments.

Using the Spray Mist

For additional moisture to help smooth out tough wrinkles, press the 'Spray Mist' button. A fine mist of water will be released from the front of the iron onto the fabric.

SPRAY MIST FEATURE

Image: The spray mist feature provides extra moisture for effective wrinkle removal.

CARE AND MAINTENANCE

Cleaning the Iron

To clean the exterior of the iron, ensure it is unplugged and completely cool. Wipe the surface with a damp rag. Do not use abrasive cleaners or scouring pads, as these can damage the finish. For the soleplate, if starch or residue builds up, clean it with a damp cloth and a non-abrasive cleaner designed for iron soleplates.

Self-Clean Feature

The iron is equipped with a self-clean button to help remove mineral deposits from the steam vents. Refer to the full user manual for detailed instructions on how to perform the self-cleaning cycle to maintain optimal steam performance.

Image: Features like Self Clean, Anti-Drip, and Anti-Calc Technology simplify maintenance.

Storage

Always store the iron upright on its heel rest to prevent damage to the soleplate. Ensure the water tank is empty before storing to prevent water spots or mineral buildup. The 8-foot 360° swivel cord can be wrapped around the base for neat storage.

Image: The cord wrap feature allows for compact and tidy storage.

TROUBLESHOOTING

Iron Not Heating

Ensure the iron is securely plugged into a working electrical outlet. Check the temperature dial to make sure it is set to a fabric setting and not 'Off'. If the iron has been idle for 30 minutes, the 3-way motion smart auto-off feature may have activated, turning the iron off for safety. Simply move the iron or press the 'Restart' button to reactivate heating.

Water Leaking from Soleplate

Ensure the temperature setting is high enough for steam production (typically Linen or Cotton settings). If the temperature is too low, water may leak instead of turning into steam. Also, verify that the water tank is not overfilled. The anti-drip system is designed to prevent leaks, but overfilling can sometimes cause issues. If using tap water, mineral buildup might be a cause; consider using distilled water and performing a self-clean cycle.

No Steam Production

Check if the water tank is filled with water. Ensure the steam control slider is set to a steam position and not 'Off'. The iron must be at a high enough temperature to produce steam; allow sufficient time for preheating. If the steam vents are clogged with mineral deposits, perform a self-clean cycle.

PRODUCT SPECIFICATIONS

Brand	Sunbeam
Model Name	Sunbeam Classic 1200 Watt Mid-size Anti-Drip Non-Stick Soleplate Iron
Model Number	32610005
Power	1200 Watts
Special Feature	Auto Shutoff, Non-stick
Color	White
Product Dimensions	9.9"L x 4.5"W
Soleplate Material	Metal (Non-Stick Coated)
Water Tank Capacity	170ml
Cord Length	8-foot (360-Degree Swivel)
UPC	027045775144
