Braun Series 5 Electric Shaver Replacement Head - 52S Instruction Manual

Official instruction manual for the Braun Series 5 52S Electric Shaver Replacement Head, compatible with Series 5 electric razors. Learn about installation, maintenance, and specifications to ensure optimal shaving performance.

INTRODUCTION

The Braun Series 5 52S Electric Shaver Replacement Head is designed to restore your Braun Series 5 electric shaver to 100% performance. Over time, the cutting parts of your shaver will gradually wear out, leading to a less close and comfortable shave. Replacing the shaver head ensures your shaver maintains its maximum performance and provides an efficient, comfortable shave.

COMPATIBILITY

This replacement head (Model 52S) is compatible with the following Braun Series 5 electric shaver models:

- Braun Series 5 (Models 5030, 5040, 5090)
- Braun Series 5 (Models 5090/5190cc, 5040/5140s, 5030s, 5147s, 5145s, 5195cc, 5197cc)

INSTALLATION

Replacing your Braun Series 5 shaver head is a simple process. Follow these steps to ensure proper installation:

1. Ensure your shaver is turned off and unplugged from any power source.
2. Grip the sides of the existing shaver head and gently pull it upwards to detach it from the shaver body.
3. Unpack the new Braun Series 5 52S replacement head.
4. Align the new head with the shaver body and press down until it clicks securely into place.
5. Verify that the head is firmly attached before turning on the shaver.

OPERATING WITH NEW HEAD

Once the new 52S replacement head is installed, your Braun Series 5 shaver will deliver optimal performance. The advanced cutting elements are designed to capture more hair in fewer strokes, providing a close and comfortable shave with minimal skin pressure and reduced irritation. For best results, shave against the direction of hair growth, holding the shaver at a 90-degree angle to your skin. Apply gentle pressure and stretch your skin with your free hand to ensure all hairs are captured.

MAINTENANCE

Regular maintenance of your shaver head is crucial for sustained performance and hygiene. Braun recommends changing your shaver head every 18 months to maintain maximum performance and prevent skin irritation.

Cleaning the Shaver Head

- After each use, turn off the shaver and remove the head.
- Rinse the shaver head under warm running water to remove hair clippings and debris.
- For a more thorough cleaning, use a cleaning brush (if provided with your shaver) to gently remove stubborn hair particles.
- Allow the shaver head to air dry completely before reattaching it to the shaver body or storing it.
- If your shaver is compatible with a Clean&Charge station, use it regularly for automatic cleaning, lubrication, and charging.

TROUBLESHOOTING

If you experience issues after replacing your shaver head, consider the following:

- **Reduced Shaving Performance:** Ensure the new head is securely attached. If performance remains

low, verify that the replacement head is genuine Braun and compatible with your specific Series 5 model.

- **Skin Irritation:** Always handle the shaver with care. If irritation occurs, ensure the shaver head is clean and that you are not applying excessive pressure during shaving. Allow your skin to adapt to the new head for a few shaves.
- **Noise or Vibration:** Check that the shaver head is correctly seated and locked into place. A loose head can cause unusual noise or vibration.

SPECIFICATIONS

Feature	Detail
Model Number	52S
Compatibility	Braun Series 5 Electric Shavers
Recommended Replacement	Every 18 months
Product Dimensions	4.02 x 1.1 x 4.37 inches
Item Weight	0.73 ounces
