

Logitech M557

Logitech M557 Bluetooth Mouse User Manual

Model: M557 (P/N: 910-003971)

1. INTRODUCTION

This manual provides instructions for the setup, operation, and maintenance of your Logitech M557 Bluetooth Mouse. The Logitech M557 is designed for seamless wireless connectivity with Bluetooth-enabled computers, laptops, and tablets, supporting various operating systems including Windows, macOS, Chrome OS, and Android.

Figure 1: Top view of the Logitech M557 Bluetooth Mouse, showing the scroll wheel, Windows button, and Logitech logo.

2. PACKAGE CONTENTS

Verify that your package contains the following items:

- Logitech M557 Bluetooth Mouse
- 1 AAA Battery (pre-installed or included separately)
- Quick Start Guide (this manual serves as a detailed guide)

3. SETUP

3.1. Battery Installation

1. Locate the battery compartment on the underside of the mouse.
2. Slide the battery compartment cover open.
3. Insert the included AAA battery, ensuring correct polarity (+/-).
4. Close the battery compartment cover.

Figure 2: Underside of the Logitech M557 mouse, showing the ON/OFF switch, Connect button, and optical sensor. The battery compartment is typically located here.

3.2. Connecting via Bluetooth

The Logitech M557 connects wirelessly via Bluetooth, requiring no USB receiver.

1. **Power On:** Slide the ON/OFF switch on the bottom of the mouse to the "ON" position. A small LED indicator on the top of the mouse may light up briefly.
2. **Activate Pairing Mode:** Press and hold the **Connect** button on the bottom of the mouse for a few seconds until the LED indicator on the top of the mouse begins to blink rapidly. This indicates the mouse is in pairing mode.
3. **Enable Bluetooth on Your Device:**
 - **Windows:** Go to *Settings > Devices > Bluetooth & other devices* Ensure Bluetooth is turned on.
 - **macOS:** Go to *System Settings > Bluetooth*. Ensure Bluetooth is turned on.
 - **Chrome OS/Android:** Go to *Settings > Connected devices > Bluetooth* Ensure Bluetooth is turned on.
4. **Pair the Mouse:** In your device's Bluetooth settings, look for "Logitech M557" in the list of available devices. Select it to initiate the pairing process.
5. **Confirmation:** Once paired, the LED indicator on the mouse will stop blinking and remain solid for a few seconds, then turn off. Your mouse is now ready for use.

Note: If the connection is lost or you wish to pair with a different device, repeat steps 2-5.

4. OPERATING YOUR MOUSE

4.1. Basic Functions

- **Left-Click Button:** Primary selection and activation.
- **Right-Click Button:** Accesses contextual menus.
- **Scroll Wheel:** Scrolls vertically through documents and web pages.
- **Tilt Wheel:** The scroll wheel can also be tilted left or right for horizontal scrolling (if supported by your operating system/application).
- **Scroll Wheel Button:** Pressing the scroll wheel acts as a middle-click button, often used for opening links in new tabs or activating specific application functions.
- **Windows Button:** Located below the scroll wheel. By default, this button opens the Start Menu or Search function on Windows. Its function may be customizable using Logitech Options software (if available for your OS).

Figure 3: Angled view of the Logitech M557 mouse, highlighting its ergonomic design and button placement.

4.2. Customizing Your Mouse (Optional)

For advanced customization of button functions and scroll behavior, Logitech may offer software such as Logitech Options. Visit the official Logitech support website for your product model to check for compatible software downloads.

5. MAINTENANCE

5.1. Cleaning

To maintain optimal performance, clean your mouse periodically:

- Use a soft, lint-free cloth slightly dampened with water or an electronics-safe cleaning solution.
- Avoid harsh chemicals or abrasive materials.
- Clean the optical sensor area on the bottom of the mouse to ensure accurate tracking.

5.2. Battery Replacement

The Logitech M557 uses one AAA battery. The average battery life is approximately 12 months, but actual life may vary based on usage.

1. When the battery is low, the LED indicator on the mouse may flash red.
2. Turn off the mouse using the ON/OFF switch on the bottom.
3. Open the battery compartment.
4. Remove the old AAA battery and dispose of it according to local regulations.
5. Insert a new AAA battery, observing correct polarity.
6. Close the battery compartment and turn the mouse back on.

6. TROUBLESHOOTING

6.1. Mouse Not Connecting or Disconnecting

- **Check Battery:** Ensure the battery is correctly installed and has sufficient charge. Replace if necessary.
- **Power Cycle:** Turn the mouse off and then on again.
- **Re-pair:** Remove "Logitech M557" from your device's Bluetooth list and repeat the pairing process (Section 3.2).
- **Device Bluetooth:** Ensure Bluetooth is enabled on your computer or tablet.
- **Interference:** Bluetooth can be affected by other wireless devices (e.g., Wi-Fi routers, other Bluetooth devices). Try moving closer to your device or away from potential sources of interference.
- **Operating System Updates:** Ensure your device's operating system and Bluetooth drivers are up to date.

6.2. Cursor Movement is Erratic or Non-Responsive

- **Clean Sensor:** Clean the optical sensor on the bottom of the mouse.
- **Surface:** Ensure you are using the mouse on a suitable surface. Highly reflective or transparent surfaces may affect tracking. A mouse pad is recommended.
- **Battery:** Low battery can affect performance. Replace the battery.

6.3. Buttons or Scroll Wheel Not Functioning

- **Re-pair:** Try re-pairing the mouse with your device.
- **Software:** If using customization software, ensure it is correctly installed and configured. Temporarily uninstalling and reinstalling the software might resolve issues.
- **Test on Another Device:** If possible, test the mouse on another Bluetooth-enabled device to determine if the issue is with the mouse or the original device.

7. SPECIFICATIONS

Feature	Detail
Brand	Logitech
Model	M557 (P/N: 910-003971)
Connectivity Technology	Bluetooth
Movement Detection	Optical
Operating System Compatibility	Windows 10, 11 or later, macOS, Chrome OS, Android
Power Source	Battery Powered
Battery Type	1 AAA battery (included)
Average Battery Life	12 months
Color	Gray
Item Weight	2.16 ounces (approx. 61 grams)
Product Dimensions (LxWxH)	3.93 x 2.28 x 1.34 inches (approx. 10 x 5.8 x 3.4 cm)

Connect your Logitech Bluetooth device

The following steps show you how to prepare your Logitech device for Bluetooth pairing and then how to pair it to a computer or device running:

- Windows
- Mac OS X
- Chrome OS
- Android
- iOS

Prepare your Logitech device for Bluetooth pairing

Most Logitech products are equipped with a Connect button and will have a Bluetooth Status LED. Usually the pairing sequence is started by holding down the Connect button until the LED starts blinking rapidly. This indicates that the device is ready for pairing.

NOTE: If you're having trouble starting the pairing process, please refer to the next documentation that came with your device, or visit the support page for your product at support.logitech.com

Windows

Select the version of Windows you're running and then follow the steps to pair your device

- Windows 7
- Windows 8
- Windows 10

Windows 7

1. Open the Control Panel.
2. Select Hardware and Sound.
3. Select Devices and Printers.
4. Select Bluetooth Devices.
5. Select Add a device.
6. In the list of Bluetooth devices, select the Logitech device you want to connect to and click Next.
7. Follow the on-screen instructions to finish pairing.

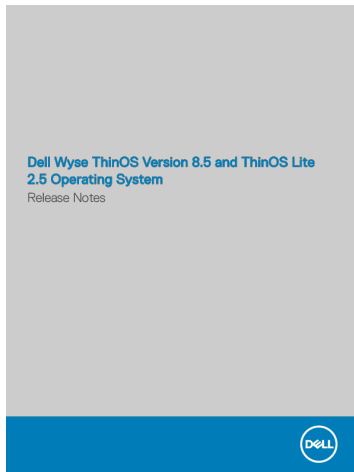

Windows 8

1. Go to Apps, then find and select Control Panel.
2. Select Devices and Printers.
3. Select Add a device.
4. In the list of Bluetooth devices, select the Logitech device you want to connect to and select Next.
5. Follow the on-screen instructions to finish pairing.

Logitech Virtual Patent Marking Program – January 23, 2023

The Logitech products listed below are produced by patents in the United States.

This list is provided in compliance with the virtual patent marking provisions of the America Invents Act for Logitech products made from January 23, 2023 until this list is next published.

This list may not be all inclusive. The Logitech products listed may be protected by additional patents, and other patents may be pending. Any Logitech products not listed may be protected by one or more patents.

Items listed below may be sold individually or as part of a combination product.

Frequently Asked Questions

1) How to enable Accessibility and Input monitoring permissions for Logitech Options

We've identified a few cases where devices aren't detected in the Logitech Options software or where the device fails to recognize connections made in the Options software. However, the device does work in out-of-box mode with no customization.

Most of the time this happens when macOS is upgraded from Mojave to Catalina or later or when newer versions of macOS are released. To resolve this problem, you can enable permissions manually. Please follow the steps below to remove the existing permissions and then add the permissions. You should then restart the system to allow the changes to take effect.

2) Logitech Options and Logitech Control Center macOS message: Legacy System Extension

If you are using Logitech Options or Logitech Control Center (LCC) on macOS you may see a message that legacy system extensions signed by Logitech Inc. will be incompatible with future versions of macOS and recommendations to contact the developer for support. Logitech is aware of this and we are working on updating Options and LCC software to ensure we comply with Apple's guidelines and device to help Apple improve its security and overall fit.

The Legacy System Extension message will be displayed the first time Logitech Options or LCC loads and again periodically while they remain installed and in use, and until we have released new versions of Options and LCC.

3) System Extension Blocked message when installing Logitech Options or LCC

Starting with macOS High Sierra (10.13), Apple has a new policy that requires user approval for all kernel framework loading. This means a "System Extension Blocked" message (shown below) during the installation of Logitech Options or Logitech Control Center (LCC).

If you receive this message, you'll need to approve the loading of the kernel framework so that your device drivers can be loaded and your device continues to work as intended with our software. To allow kernel framework loading, please open System Preferences and navigate to the Security & Privacy section. On the General tab, you should see a message and an Allow button, as shown below. In order to load the drivers, click Allow. You may need to restart your system so the drivers are properly loaded and the functionality of your mouse is restored.

NOTE: As set by the system, the Allow button is only available for 30 minutes. If it has been longer than that since you installed LCC or Logitech Options, please restart your system to see the Allow button under the Security & Privacy section of System Preferences.

NOTE: If you don't allow kernel framework loading, all devices supported by LCC will not be detected by software. For Logitech Options, you need to perform this operation if you're using following device:

LOGITECH MX ANYWHERE 2 WIRELESS MOBILE MOUSE

Portable precision anywhere you work

Your job doesn't just happen in a room with your name on the door. It happens in coffee shops, airplane seats, hotel rooms and off-site meetings. The compact and powerful MX Anywhere 2 works everywhere you do and on just about any surface.

FEATURES AT A GLANCE

- Tracks virtually anywhere** - Precision tracking works on glass and high-gloss surfaces.
- Lightest, compact design** - Weighs in at just 95g (3.35 oz) and is only 40mm (1.57 in) high.
- Our wireless connection** - Connects to your computer via the included USB receiver or via Bluetooth® Smart wireless technology.

Easy button technology

Our easy button technology lets you click with just one finger. It's the most comfortable way to click on any surface.

Hyper-fast scrolling

Scrolls faster and smoother than any other mouse. It's the most comfortable way to scroll on any surface.

Rechargeable battery

Rechargeable battery with up to 70 days of use on a full charge. The battery level is shown on the LED light bar.

WORKS WITH

- Windows 7, 8, 10
- Mac OS X, 10.10 or later
- Chrome OS
- Android
- iOS

Connect your Logitech Bluetooth device

The following steps show you how to prepare your Logitech device for Bluetooth pairing and then how to pair it to computers or devices running:

- Windows
- Mac OS X
- Chrome OS
- Android
- iOS

Prepare your Logitech device for Bluetooth pairing

Most Logitech products can be prepared with a Connect button and will have a Bluetooth Status LED. Usually the pairing sequence is started by holding down the Connect button until the LED starts blinking rapidly. This indicates that the device is ready for pairing.

NOTE: If you're having trouble starting the pairing process, please refer to the user documentation that came with your device, or visit the support page for your product at support.logitech.com.

Windows

Select the version of Windows you're running and then follow the steps to pair your device:

- Windows 7
- Windows 8
- Windows 10

Windows 7

- Open the Control Panel.
- Select Hardware and Sound.
- Select Devices and Printers.
- Select Bluetooth Devices.
- Select Add a device.
- In the list of Bluetooth devices, select the Logitech device you want to connect to and click Next.
- Follow the on-screen instructions to finish pairing.

Windows 8

- Click Start, then find and select Control Panel.
- Select Devices and Printers.
- Select Add a device.
- In the list of Bluetooth devices, select the Logitech device you want to connect to and click Next.
- Follow the on-screen instructions to finish pairing.
