DEWALT DWFP55126 6-Gallon 165 PSI Pancake Air Compressor User Manual

Model: DWFP55126

1. INTRODUCTION

This manual provides essential instructions for the safe operation, maintenance, and troubleshooting of your DEWALT DWFP55126 6-Gallon, 165 PSI Pancake Air Compressor. Please read this manual thoroughly before operating the compressor to ensure proper use and to prevent injury or damage.

The DEWALT DWFP55126 is a heavy-duty 6.0-gallon air compressor designed to support a variety of pneumatic and air tool applications. Its oil-free pump delivers 2.6 SCFM at 90 PSI, ensuring long tool runtime and quick recovery. The compact design includes a cord wrap for convenient storage.

2. SAFETY INFORMATION

Always observe basic safety precautions to reduce the risk of fire, electric shock, and personal injury when using this product.

2.1 General Safety

- Read all instructions before operating the compressor.
- Keep the work area clean and well-lit. Cluttered or dark areas invite accidents.
- Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust. Power tools create sparks which may ignite the dust or fumes.
- Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.
- Never direct compressed air at people or animals.
- Ensure the compressor is placed on a stable, level surface during operation.

2.2 Electrical Safety

- The compressor must be grounded. If it malfunctions or breaks down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock.
- Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- Do not abuse the cord. Never use the cord for carrying, pulling, or unplugging the power tool. Keep cord away from heat, oil, sharp edges, or moving parts. Damaged or entangled cords increase the risk of electric shock.

- Use only extension cords rated for outdoor use and appropriate for the compressor's power requirements (14 gauge or larger, 50 ft. or less).

2.3 Personal Safety

- Always wear eye protection that conforms to ANSI Z87.1 when operating the compressor or air tools.
- Wear hearing protection during extended periods of operation. The compressor produces a noise level of approximately 78.5 dBA.
- Dress properly. Do not wear loose clothing or jewelry. Keep your hair, clothing, and gloves away from moving parts.
- Stay alert, watch what you are doing, and use common sense when operating a power tool.
