Tommee Tippee Natural Start

Tommee Tippee Natural Start Anti-Colic Baby Bottles User Manual

Model: Natural Start | Brand: Tommee Tippee

Introduction

The Tommee Tippee Natural Start Anti-Colic Baby Bottles are designed to facilitate a seamless transition between breast and bottle feeding. Featuring a breast-like nipple with an anti-colic valve, these bottles aim to reduce air intake and prevent nipple confusion. They are 100% leakproof and can be self-sterilized in just three minutes, offering convenience for parents.

What's in the Box

- 6 x 9oz Tommee Tippee Natural Start Anti-Colic Baby Bottles (Fiesta colors)

Components

Each Tommee Tippee Natural Start bottle consists of three main components:

1. **Bottle Body:** The main container for milk, with measurement markings.
2. **Nipple:** Soft silicone, breast-like shape with an anti-colic valve.
3. **Screw Ring and Cap:** Secures the nipple to the bottle and provides a leakproof seal.

Setup

Before First Use:

1. Disassemble all components: bottle, nipple, screw ring, and cap.
2. Wash all parts thoroughly in warm soapy water.
3. Rinse all components with clean water.
4. Sterilize all components using one of the methods described in the "Maintenance" section.

Assembly:

1. Insert the nipple into the screw ring until it clicks into place.
2. Screw the assembled nipple and ring onto the bottle body. Ensure it is securely fastened to prevent leaks.
3. Place the cap over the nipple for hygiene and transport.

Operating

Feeding Instructions:

1. Prepare formula or breast milk according to guidelines.
2. Fill the bottle to the desired volume, using the measurement markings.
3. Ensure the nipple and screw ring are securely attached.
4. Always check the milk temperature before feeding your baby.
5. Allow your baby to feed comfortably at their own pace. The soft silicone nipple flexes and stretches, mimicking natural breastfeeding.

Nipple Flow Guide:

Tommee Tippee Natural Start nipples are available in various flow rates to suit your baby's needs as they grow:

- **0m+ Extra Slow:** For a gentle pace, ideal for first feeds.
- **0m+ Slow:** For slower-paced feeds from birth.
- **3m+ Medium:** A medium pace to keep up with growing appetites.
- **6m+ Fast:** The largest opening for a faster flow.
- **6m+ Thick (Y-cut):** Designed for thickened milk flows without clumping.

Maintenance (Cleaning and Sterilization)

Cleaning:

- Always wash all bottle components immediately after each use.
- Use warm soapy water and a bottle brush to clean the inside of the bottle and nipple.
- Ensure all milk residue is removed.
- Rinse thoroughly with clean water.
- The bottles are dishwasher safe (top rack only).

Self-Sterilization:

The Tommee Tippee Natural Start bottles feature a convenient self-sterilizing function using a microwave:

1. Add 50ml of water to the bottle.
2. Rest the assembled hood, ring, and nipple on top of the bottle (do not fasten).
3. Heat in the microwave for 3 minutes.

Troubleshooting

Leakage:

- Ensure the screw ring is tightened securely onto the bottle.
- Verify the nipple is correctly inserted into the screw ring.
- Check for any damage or wear on the nipple or bottle components. Replace if necessary.

Baby Refuses Bottle or Feeds Slowly/Too Fast:

- **Slow Feeding/Refusal:** Your baby might need a faster flow nipple. Observe for gulping, coughing, or milk dripping, which could indicate the flow is too fast.
- **Fast Feeding/Gulping:** Your baby might need a slower flow nipple. Observe if feeding takes longer than 20 minutes, if they tug at the nipple, or fall asleep during feeding, which could indicate the flow is too slow.
- Ensure the anti-colic valve is clear and functioning correctly.
