1. Ensure the amplifier is turned off and unplugged from the power outlet.
2. Connect your speakers to the speaker terminals on the rear panel of the amplifier. Pay close attention to polarity: connect the positive (+) terminal of the amplifier to the positive (+) terminal of the speaker, and the negative (-) terminal of the amplifier to the negative (-) terminal of the speaker.
3. Use high-quality speaker cables for optimal sound performance.

### 3. Audio Source Connection:

Connect your audio sources (e.g., CD player, turntable, tuner, tape deck) to the corresponding input jacks on the rear panel using RCA cables.

### 4. Power Connection:

Once all audio and speaker connections are made, plug the amplifier's power cord into a suitable AC wall outlet.

## OPERATING INSTRUCTIONS

## 1. Power On/Off:

Press the **POWER** button to turn the amplifier on or off. A slight delay may occur before the unit fully powers up.

## 2. Input Selection:

Use the **INPUT SELECTOR** knob or buttons on the front panel to choose the desired audio source (e.g., CD, PHONO, TUNER, TAPE).
