

ASPECTEK Predator Eye

ASPECTEK Predator Eye Animal Deterrent Instruction Manual

Model: Predator Eye

1. INTRODUCTION

The ASPECTEK Predator Eye is a solar-powered animal deterrent designed to protect your property from nocturnal pests. It utilizes flashing red lights to mimic the eyes of a predator, discouraging animals such as coyotes, raccoons, skunks, foxes, wolves, deer, and cougars from entering protected areas. This device offers a humane and eco-friendly solution for pest control without the use of harmful chemicals or traps.

2. SAFETY INFORMATION

- Keep the device out of reach of children.
- Do not attempt to open or modify the device, as this may void the warranty and cause damage.
- Ensure proper installation to prevent the device from falling and causing injury or damage.
- While designed for outdoor use, avoid submerging the device in water.

3. PACKAGE CONTENTS

Your ASPECTEK Predator Eye package typically includes:

- ASPECTEK Predator Eye Unit(s)
- Mounting hardware (screws, anchors)
- Instruction Manual

4. FEATURES

- **Solar-Powered Operation:** Charges during the day using its integrated solar panel, providing power for night-time operation.
- **Flashing Red Lights:** Emits two powerful, flashing red lights that simulate predator eyes, deterring nocturnal animals.
- **Weatherproof Design:** Built to withstand various weather conditions, ensuring reliable performance year-round.

- **Humane and Eco-Friendly:** Provides an economical, humane, and innovative solution to pest control without harmful chemicals or traps.
- **Wide Coverage:** Effective for areas up to 4,600 sq. ft. (approximately 1,500 yards).

5. SETUP

5.1 Unpacking

Carefully remove the Predator Eye unit(s) and all accessories from the packaging. Inspect for any damage. If any components are missing or damaged, contact customer support.

5.2 Battery Activation

The Predator Eye is equipped with internal rechargeable batteries. Before first use, ensure the device is exposed to direct sunlight for at least 8-10 hours to allow for initial charging. Some units may require you to press firmly to secure the battery in its compartment to ensure the red light is on.

5.3 Mounting

The Predator Eye can be mounted on posts, fences, or other suitable structures using the provided mounting hardware. Ensure the solar panel faces upwards to receive maximum sunlight during the day.

Image: The Predator Eye features a solar panel for automatic recharging during the day.

6. OPERATING INSTRUCTIONS

The ASPECTEK Predator Eye operates automatically. During daylight hours, the solar panel charges the internal batteries. As dusk approaches and light levels decrease, the device will automatically activate, emitting powerful flashing red lights throughout the night. These lights are designed to deter nocturnal animals by simulating the presence of a predator.

7. PLACEMENT GUIDELINES

Optimal placement is crucial for the effectiveness of the Predator Eye. Consider the following:

- **Target Areas:** Place the device in areas frequently visited by target animals.
- **Sunlight Exposure:** Ensure the solar panel receives direct sunlight for most of the day to maximize charging efficiency. Avoid shaded areas.
- **Noise and Obstructions:** Position the device away from strong artificial light sources or noisy environments that might reduce its effectiveness. Ensure there are no physical obstructions blocking the line of sight of the flashing lights.
- **Height for Specific Animals:** Adjust the mounting height based on the type of animal you wish to deter.

Image: Recommended mounting height for deterring small animals (e.g., mice, squirrels, skunks, raccoons) is approximately 0.6 meters (1.9 feet) from the ground.

Image: Recommended mounting height for deterring large animals (e.g., foxes, deer, coyotes) is approximately 1.2 meters (3.9 feet) from the ground.

Image: Recommended mounting height for deterring flying animals (e.g., birds of prey) is approximately 2.4 meters (8 feet) from the ground.

8. MAINTENANCE

- **Clean Solar Panel:** Regularly wipe the solar panel with a soft, damp cloth to remove dust, dirt, or debris that may hinder charging efficiency.
- **Inspect for Damage:** Periodically check the device for any physical damage, especially after severe weather conditions.
- **Battery Life:** The internal rechargeable batteries are designed for long-term use. If the device's performance significantly degrades over time, the batteries may need replacement.

WEATHERPROOF
IP77 CERTIFIED, WORKS EVEN IN THE ICE

9. TROUBLESHOOTING

Problem	Possible Cause	Solution
Red light does not illuminate at night.	Insufficient solar charge.	Ensure the solar panel is clean and receives at least 8-10 hours of direct sunlight daily.
	Battery not properly connected.	Check battery placement in the battery box and press firmly to secure the battery.
Device not deterring animals effectively.	Incorrect placement or height.	Refer to the 'Placement Guidelines' section to adjust the device's location and height according to the target animal. Consider using multiple units for larger areas.

Problem	Possible Cause	Solution
	Animals have habituated to the light.	Occasionally change the device's location to prevent animals from becoming accustomed to it.

10. SPECIFICATIONS

- **Product Dimensions:** 3.4 x 3.2 x 3.2 inches
- **Item Weight:** 2.47 ounces
- **Power Source:** Solar-powered (rechargeable batteries)
- **Battery Type:** 2 AA batteries required (internal)
- **Model Number:** Aspectek Predator Eye Night Time
- **Manufacturer:** handletech
