- Adjust Levels:** Monitor the input levels on the LCD screen and adjust the gain knobs to prevent clipping (distortion). Aim for levels that peak around -12dB.
- Start Recording:** Press the **RECORD** button (red circle) once to arm recording. Press it again to start recording. The record indicator will illuminate.
- Stop Recording:** Press the **STOP** button (square) to end recording.
- File Format:** Recordings are saved in WAV format at up to 24-bit/96kHz resolution.

3. Playback

After recording, use the navigation buttons to select a file. Press the **PLAY/PAUSE** button to begin playback. Adjust the headphone volume using the dedicated volume controls on the side.

4. USB Audio Interface Functionality

The H5 can function as a USB audio interface. Connect the device to your computer using a USB cable. Select "Audio Interface" mode on the H5 when prompted. This allows you to use the H5's high-quality preamps and inputs for computer-based recording.

MAINTENANCE

- Cleaning:** Use a soft, dry cloth to clean the exterior of the unit. Avoid using abrasive cleaners or solvents.
- Storage:** When not in use for extended periods, remove the batteries to prevent leakage. Store the H5 in a cool, dry place,

away from direct sunlight and extreme temperatures.

- **Microphone Care:** Handle microphone capsules with care. Avoid dropping or exposing them to excessive moisture or dust.

TROUBLESHOOTING

No Power:

Ensure batteries are correctly inserted and fully charged. Check if the power switch is held long enough to power on.

No Recording/Playback:

Verify that a MicroSD card is inserted and has sufficient free space. Check input arming and gain levels before recording.

Ensure the correct file is selected for playback.

Distorted Audio:

Reduce input gain levels to prevent clipping. Check microphone placement and ensure it's not too close to the sound source.

Unit feels sticky:

Over time, the rubberized coating on some units may become sticky. This is a known cosmetic issue and does not typically affect functionality. Gentle cleaning with a damp cloth (water only) may help, but avoid harsh chemicals.
