ABB TEY/Q-Line THQB32050 3-Pole Miniature Circuit Breaker Instruction Manual

Model: THQB32050

1. INTRODUCTION

This manual provides essential information for the safe and effective installation, operation, and maintenance of the ABB TEY/Q-Line THQB32050 3-Pole Miniature Circuit Breaker. Please read this manual thoroughly before proceeding with any installation or operation to ensure proper function and safety.

2. SAFETY INFORMATION

WARNING: Risk of electric shock or fire. Installation and servicing must be performed by qualified personnel only. Always disconnect power at the main service panel before working on circuit breakers or electrical systems.

Observe all local and national electrical codes. Ensure the circuit breaker rating matches the circuit requirements. Do not use this device if it appears damaged.

3. PRODUCT OVERVIEW

The ABB THQB32050 is a 3-pole miniature circuit breaker designed for reliable overcurrent protection in residential and commercial electrical distribution systems. It features a 50A current rating and a 10kA interrupting capacity.

Figure 3.1: Angled view of the ABB THQB32050 3-Pole Miniature Circuit Breaker.

Key Features:

- **3-Pole Design:** Provides protection for three phases or two phases and a neutral.
- **50A Current Rating:** Suitable for circuits requiring 50 Amperes of protection.
- **Bolt-On Installation:** Ensures a secure and robust connection to electrical panels.
- **Quick-make / Quick-break Technology:** Facilitates immediate electrical disconnection during overcurrent events, reducing equipment damage.
- **10kA Interrupting Capacity:** Capable of handling severe overcurrents and short circuits at 120V and 240V.
- **Visible Trip Indicators:** Allows for quick identification of tripped circuits for efficient maintenance.

4. SETUP AND INSTALLATION

The THQB32050 circuit breaker is designed for bolt-on installation into compatible electrical panels. Ensure the panel is de-energized before beginning installation.

Installation Steps:

1. **De-energize Panel:** Turn off the main power supply to the electrical panel at the utility meter or main disconnect. Verify with a voltage tester that all circuits are de-energized.

2. **Identify Mounting Location:** Select an appropriate slot in the electrical panel for the 3-pole breaker.
3. **Position Breaker:** Align the bolt-on terminals of the THQB32050 with the corresponding bus bar connections in the panel.
4. **Secure Breaker:** Fasten the breaker securely to the bus bar using the integrated bolt-on mechanism. Ensure a tight and reliable connection.
5. **Wire Connections:** Connect the load wires to the appropriate terminals on the circuit breaker. Ensure all connections are tight and properly insulated. Refer to local electrical codes for wire sizing and torque specifications.
6. **Verify Installation:** Double-check all connections and ensure the breaker is firmly seated.
7. **Re-energize Panel:** Restore power to the electrical panel.

Figure 4.1: Front view of the circuit breaker, illustrating terminal locations for wiring.

5. OPERATING INSTRUCTIONS

The ABB THQB32050 circuit breaker operates with a simple ON/OFF mechanism and provides clear trip indication.

Operation:

- **To Turn ON:** Push the handle firmly to the 'ON' position.

- **To Turn OFF:** Push the handle firmly to the 'OFF' position.
- **Trip Indication:** If an overcurrent or short circuit occurs, the breaker will automatically trip. The handle will move to a central, 'TRIPPED' position, which is typically between 'ON' and 'OFF'.
- **Resetting a Tripped Breaker:** To reset a tripped breaker, first move the handle completely to the 'OFF' position, then push it firmly to the 'ON' position. Investigate the cause of the trip before resetting.

Figure 5.1: Side view of the circuit breaker, highlighting the ON/OFF switch and trip indicator area.

6. MAINTENANCE

The ABB THQB32050 circuit breaker is designed for minimal maintenance. Regular visual inspections are recommended to ensure optimal performance and safety.

Recommended Maintenance:

- **Visual Inspection:** Periodically inspect the breaker for any signs of physical damage, discoloration, or loose connections.
- **Cleanliness:** Ensure the area around the circuit breaker is free from dust, debris, and moisture.
- **Connection Check:** During scheduled electrical system maintenance, verify that all bolt-on connections remain tight.
- **Testing:** Do not attempt to test the tripping mechanism by intentionally creating a short circuit. This can be

dangerous and damage the electrical system.

7. TROUBLESHOOTING

If the circuit breaker trips frequently or fails to operate correctly, consider the following troubleshooting steps:

- **Frequent Tripping:** This often indicates an overload or a short circuit on the protected circuit. Disconnect appliances or devices from the circuit and try resetting the breaker. If it continues to trip, consult a qualified electrician to identify and resolve the underlying electrical issue.
- **Breaker Does Not Reset:** Ensure the handle is moved fully to the 'OFF' position before attempting to move it to 'ON'. If it still does not reset, there may be a persistent fault on the circuit or the breaker itself may be faulty. Do not force the handle.
- **No Power to Circuit:** Check if the breaker is in the 'ON' position. If it is, and there's still no power, verify connections or consult an electrician.
- **Visible Damage:** If the breaker shows signs of burning, melting, or other physical damage, it must be replaced immediately by a qualified electrician.

8. SPECIFICATIONS

Specification	Value
Brand	ABB
Model Number	THQB32050
Current Rating	50 Amps
Circuit Breaker Type	Standard
Mounting Type	Bolt-On Mount
Number Of Poles	3
Voltage Rating	120/240 VAC
Interrupting Capacity	10 kA
Trip Type	Thermal Magnetic

9. WARRANTY INFORMATION

For specific warranty details regarding your ABB THQB32050 circuit breaker, please refer to the warranty documentation provided at the time of purchase or visit the official ABB website. Warranty terms typically cover manufacturing defects under normal use conditions.

10. SUPPORT

If you require further assistance, technical support, or have questions not covered in this manual, please contact ABB customer service or visit the official ABB support website. Always provide the model number (THQB32050) when seeking support.
