Troubleshooting

Problem	Possible Cause	Solution
Water seeps into hair.	Cap not positioned correctly or elastic is stretched.	Ensure all hair is tucked inside the cap and the elastic forms a tight seal around the hairline. If the elastic is worn, consider replacing the cap.
Cap feels too tight or too loose.	Incorrect sizing or improper adjustment.	The Betty Dain shower cap is designed to be oversized and fit most head sizes. Adjust the cap to ensure it sits comfortably without being too restrictive or allowing gaps.

Problem	Possible Cause	Solution
Unpleasant odor or mildew.	Cap not dried properly after use.	Always air dry the cap completely after each use. If mildew is present, wash thoroughly as per cleaning instructions. If odor persists, replacement may be necessary.
