Tefal 91822120

Tefal Anti-Odour Filter User Manual

Model: 91822120

1. Introduction

This manual provides essential information for the proper use and maintenance of your Tefal Anti-Odour Filters. These filters are designed specifically for the Tefal Cheese Cellar model 9182012 to help maintain an optimal environment for cheese storage by neutralizing unwanted odors.

2. Product Overview

The Tefal Anti-Odour Filters are replacement components for your cheese cellar. Each set contains six individual anti-odour refill filters, ensuring a long-lasting supply for continuous odor control.

Figure 2.1: A set of Tefal Anti-Odour Filters. These dark grey, rectangular pads are designed to absorb and neutralize odors within the cheese cellar.

Figure 2.2: The Tefal Cheese Cellar (model 9182012) for which these anti-odour filters are intended. The cellar features a clear lid with a ventilation system where the filters are installed.

3. Installation and Replacement

To ensure optimal performance, replace the anti-odour filter in your Tefal Cheese Cellar regularly. Follow these steps for proper installation:

1. **Locate the Filter Compartment:** The filter compartment is typically located on the underside of the cheese cellar's lid. It may be covered by a small removable grate or panel.

2. **Remove the Old Filter:** Carefully open the compartment and remove the used anti-odour filter. Dispose of the old filter responsibly.
3. **Insert the New Filter:** Take one new Tefal Anti-Odour Filter from the pack. Ensure it is clean and dry. Place the new filter into the compartment, making sure it lies flat and fits securely.
4. **Close the Compartment:** Securely close the filter compartment. Ensure it clicks into place if it has a latch.
5. **Clean the Cellar (Optional but Recommended):** While the lid is off, it is a good opportunity to clean the cheese cellar itself with a damp cloth and mild detergent, then dry thoroughly before reassembling.

Note: Refer to your specific Tefal Cheese Cellar manual for detailed diagrams or instructions if the filter compartment is not immediately apparent.

4. Operating Principles

The Tefal Anti-Odour Filters utilize specialized materials designed to absorb and neutralize strong odors emitted by cheeses. By placing the filter within the designated compartment of the cheese cellar, it actively works to maintain a neutral and fresh environment, preventing cheese odors from permeating your refrigerator or kitchen.
The effectiveness of the filter depends on its active surface area and the amount of odor it has absorbed. Over time, the filter's capacity to absorb odors diminishes, necessitating replacement.

5. Maintenance

Regular replacement of the anti-odour filter is crucial for maintaining the effectiveness of your Tefal Cheese Cellar.

- **Replacement Frequency:** It is recommended to replace the filter every 3 to 6 months, or more frequently if you store particularly strong-smelling cheeses or notice a decrease in odor control.
- **Storage of New Filters:** Store unused filters in their original packaging in a cool, dry place away from direct sunlight and strong odors to preserve their effectiveness.
- **Cleaning:** The filters themselves are not washable or reusable. Attempting to clean them will damage their odor-absorbing properties.

6. Troubleshooting

If you experience persistent odors despite using the Tefal Anti-Odour Filters, consider the following:

- **Filter Age:** Check if the filter needs replacement. An old, saturated filter will no longer effectively absorb odors.
- **Proper Installation:** Ensure the filter is correctly seated in its compartment and the compartment is securely closed.
- **Cellar Cleanliness:** The cheese cellar itself should be regularly cleaned to prevent odor buildup on its surfaces.
- **Cheese Condition:** Ensure the cheeses stored are in good condition. Spoiled or excessively strong cheeses may overwhelm the filter's capacity.
- **Air Circulation:** While the filter works to contain odors, ensure the cheese cellar is not placed in an area with extremely poor air circulation, which could exacerbate odor issues.

7. Specifications

Product Name	Tefal Anti-Odour Filters for Cheese Cellar
Model Number	91822120
ASIN	B00KG9HLAW

Quantity per Pack	6 filters
Intended Use	Replacement filters for Tefal Cheese Cellar model 9182012
Item Weight	2.11 ounces (approx. 60 grams)
Package Dimensions	5.93 x 5.93 x 3.58 inches

8. Warranty and Support

For specific warranty information regarding your Tefal Anti-Odour Filters or the Tefal Cheese Cellar, please refer to the documentation provided with your original cheese cellar purchase or visit the official Tefal website. For customer support, contact Tefal directly through their official channels.
