Gira 021103

Gira System 55 Standard 55 Single Frame Instruction Manual

Model: 021103

1. INTRODUCTION

This manual provides essential information for the installation, operation, and maintenance of your Gira System 55 Standard 55 Single Frame. The Gira System 55 is designed for intelligent building technology, offering a high-quality solution for electrical installations. This single frame is part of a system that supports over 300 functions, ensuring convenient, safe, and cost-effective electrical setups. Its robust metal construction ensures durability and resistance to wear and tear.

2. SAFETY INFORMATION

WARNING: Electrical installations should only be performed by qualified personnel. Incorrect installation can lead to electric shock, fire, or serious injury.

- Always disconnect power at the main circuit breaker before beginning any electrical work.
- Ensure all wiring connections are secure and comply with local electrical codes.
- Do not install in wet or damp locations unless specifically rated for such environments.
- Keep children away from electrical components during installation.
- If you are unsure about any part of the installation process, consult a licensed electrician.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation.

- 1 x Gira System 55 Standard 55 Single Frame (Model 021103)
- (Mounting screws may be included with the associated insert, not typically with the frame itself)

4. SETUP AND INSTALLATION

The Gira System 55 Single Frame is designed for screw-in installation and is compatible with various Gira System 55 inserts (e.g., switches, sockets).

1. **Prepare the Installation Area:** Ensure the electrical box or mounting surface is clean and free of debris. Turn off power at the circuit breaker.

2. **Install the Insert (if applicable):** If you are installing a switch or socket insert, follow its specific instructions to connect the wiring.
3. **Position the Frame:** Align the Gira System 55 Single Frame over the installed insert and the mounting screws.
4. **Secure the Frame:** Gently push the frame onto the insert until it clicks into place. The frame is designed to snap onto the insert, which is then secured to the wall box.
5. **Final Check:** Ensure the frame is flush with the wall and securely attached. Restore power at the circuit breaker.

Figure 4.2: Back view of the Gira System 55 Standard 55 Single Frame, illustrating the mechanism for attaching to an electrical insert.

5. OPERATION

The Gira System 55 Single Frame serves as a decorative and protective cover for electrical inserts (e.g., light switches, power outlets). Once installed, its primary function is to provide a finished aesthetic and secure the underlying electrical component. Operation of the electrical function itself (e.g., turning a light on/off, plugging in a device) is dependent on the specific insert installed within the frame.

6. MAINTENANCE

To ensure the longevity and appearance of your Gira System 55 Single Frame:

- **Cleaning:** Wipe the frame with a soft, damp cloth. Avoid abrasive cleaners, solvents, or harsh chemicals, as these can damage the polished finish.
- **Inspection:** Periodically check the frame for any signs of damage or looseness. If the frame becomes loose, ensure

the underlying electrical insert is securely mounted.

- **Repair:** Do not attempt to repair damaged electrical components. Replace the frame or consult a qualified electrician if damage occurs.

7. TROUBLESHOOTING

As the single frame is a passive component, troubleshooting is generally limited to physical issues.

Problem	Possible Cause	Solution
Frame is loose or detached.	Underlying electrical insert not securely mounted, or frame not properly snapped into place.	Ensure power is off. Re-secure the electrical insert to the wall box. Re-attach the frame firmly until it clicks.
Scratches or damage to the frame.	Physical impact or abrasive cleaning.	The frame is made of durable material, but severe damage may require replacement.

8. SPECIFICATIONS

Feature	Detail
Brand	Gira
Model Number	021103
Material	Metal
Colour	Glossy white
Finish Type	Polished
Configuration	Single
Product Dimensions (W x H)	8W x 1H centimetres
Item Weight	18 g
Installation Type	Screw-In
UPC	613165552323
ASIN	B00KJAWLC6
