OccuNomix 931-OR

OccuNomix MiraCool PVA Cooling Towel User Manual

Model: 931-OR

Introduction

The OccuNomix MiraCool PVA Cooling Towel is designed to provide instant cooling relief. Made from lightweight, super absorbent PVA material, it effectively holds water without adding significant weight, making it ideal for various activities where heat stress is a concern. This manual provides instructions for proper use, care, and maintenance of your cooling towel.

Features

- Provides instant cooling relief.
- Activates simply by adding water.
- Reusable and easy to recharge.
- Constructed from lightweight, super absorbent PVA material.
- Machine washable for easy cleaning.
- Available in orange color (for this model).
- Country of origin: China.

Setup and Activation

To activate your MiraCool PVA Cooling Towel, follow these simple steps:

1. **Hydrate the Towel:** Submerge the entire towel in cool water for approximately one minute. Ensure it is fully saturated.
2. **Remove Excess Water:** Gently wring out the towel to remove any excess water. The towel should be damp but not dripping.
3. **Prepare for Use:** The towel is now activated and ready to provide cooling relief.

Operating Instructions

Once activated, place the cooling towel directly on your skin or over clothing in areas where you need cooling, such as around your neck, forehead, or wrists. The evaporative cooling process will draw heat away from your body, providing a refreshing sensation. Re-wet the towel as needed to maintain its cooling effect.

Care and Maintenance

Proper care will extend the life of your MiraCool PVA Cooling Towel:

- **Cleaning:** The towel is machine washable. Wash with like colors in cold water. Do not use bleach.
- **Drying:** Air dry the towel. Do not tumble dry. When dry, the towel may become stiff. This is normal for PVA material.
- **Storage:** For long-term storage, ensure the towel is completely dry to prevent mildew. If it becomes stiff, simply re-wet it to restore its soft, pliable texture.

Troubleshooting

If your cooling towel is not performing as expected:

- **Towel feels stiff:** This is a natural characteristic of PVA material when dry. Simply re-wet the towel thoroughly with water to restore its flexibility and cooling properties.
- **Insufficient cooling:** Ensure the towel is fully saturated with water and gently wrung out. If it's too dry, it won't cool effectively. If it's too wet, it may not evaporate efficiently.

Specifications

Model Number	931-OR
Brand	OccuNomix
Towel Form Type	Cooling Towel
Style	PVA Cooling Towel
Product Dimensions	1 x 2.17 x 3.07 inches (packaged); 6.4 ounces
Manufacturer	OccuNomix
Age Range (Description)	Adult
Number of Items	1
