Nova 9301-R

NOVA 9301-R Handheld Shower Head Instruction Manual

Model: 9301-R

1. Introduction

This manual provides detailed instructions for the installation, operation, and maintenance of your NOVA 9301-R Handheld Shower Head. Designed for enhanced bathing independence and convenience, this shower head features an extra-long 84-inch reinforced hose, an on/off pause switch, and a wall-mount holder. It is ideal for seniors, individuals with limited mobility, and for tasks such as pet washing.

2. Safety Information

WARNING:

- Always test water temperature before use to prevent scalding.
- Ensure all connections are secure to prevent leaks and water damage.
- Do not use excessive force when adjusting the shower head or hose.
- Statements regarding dietary supplements have not been evaluated by the FDA and are not intended to diagnose,

treat, cure, or prevent any disease or health condition.

3. Package Contents

Verify that all components are present before beginning installation:

- Handheld Shower Head with On/Off Pause Switch
- Extra-Long 84-inch Reinforced Hose
- Wall-Mount Holder
- Washers and Plumber's Tape (PTFE Tape)

Figure 2: All components included in the NOVA 9301-R package.

4. Setup & Installation

Installation is designed to be quick and easy, typically requiring no specialized tools. Follow these steps:

1. **Remove Existing Shower Head:** Unscrew your current shower head from the shower arm. Clean any residue from the shower arm threads.
2. **Apply Plumber's Tape:** Wrap plumber's tape clockwise around the threads of the shower arm 3-4 times. This helps prevent leaks.
3. **Install Wall-Mount Holder:** Screw the wall-mount holder onto the shower arm. Hand-tighten until snug, then give it an

additional quarter turn with a wrench if necessary, being careful not to overtighten. Ensure the holder is oriented correctly to support the handheld shower head.

4. **Connect Hose to Holder:** Insert a washer into one end of the 84-inch reinforced hose. Connect this end to the bottom outlet of the wall-mount holder. Hand-tighten securely.
5. **Connect Hose to Shower Head:** Insert a washer into the other end of the hose. Connect this end to the base of the handheld shower head. Hand-tighten securely.
6. **Test for Leaks:** Turn on the water and check all connections for leaks. If leaks occur, tighten the connections slightly or reapply plumber's tape.

5. Operating Instructions

Your NOVA Handheld Shower Head offers convenient features for a personalized bathing experience:

- **On/Off Pause Switch:** Located on the handle, this switch allows you to easily pause the water flow directly from the shower head. This is useful for conserving water while lathering or for managing water flow during assisted bathing or pet washing.
- **Spray Settings:** The shower head features multiple spray settings. Rotate the dial on the shower head face to cycle through different spray patterns, from a gentle rinse to a more invigorating massage.
- **Flexible Hose:** The extra-long 84-inch hose provides extended reach, making it easy to shower while seated, wash pets, or clean the shower area.

6. Maintenance

To ensure optimal performance and longevity of your shower head, regular maintenance is recommended:

- **Cleaning Nozzles:** Over time, mineral deposits can build up in the spray nozzles, affecting water flow. Gently rub the rubber nozzles with your finger or a soft brush to dislodge any deposits. For stubborn buildup, a solution of equal parts white vinegar and water can be used to soak the shower head (if detachable) or applied directly to the nozzles.
- **Hose Care:** Periodically inspect the hose for any signs of wear, kinks, or damage. Clean the hose exterior with a mild soap and water solution.
- **Holder Maintenance:** Keep the wall-mount holder clean by wiping it with a soft, damp cloth.

7. Troubleshooting

If you encounter any issues with your NOVA Handheld Shower Head, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Water leaks from connections	Loose connections, worn washers, insufficient plumber's tape.	Ensure all connections are hand-tightened. Check that washers are properly seated and not damaged. Reapply plumber's tape if necessary.
Weak water pressure	Clogged nozzles, water restrictor, low household water pressure.	Clean the spray nozzles as described in the Maintenance section. Ensure your main water supply is fully open. Consult a plumber if household water pressure is consistently low.
On/Off switch is stiff or stuck	Mineral buildup around the switch mechanism.	Soak the shower head in a vinegar solution to dissolve mineral deposits. Gently work the switch back and forth to loosen it.

8. Specifications

- **Model Number:** 9301-R
- **Product Dimensions:** 9 x 3.75 x 5 inches
- **Item Weight:** 1 Pound
- **Hose Length:** 84 inches

- **Brand:** Nova
- **Style:** Modern
- **Shape:** Round
- **Finish Type:** Polished
- **Installation Type:** Wall Mounted

9. Warranty & Support

For warranty information or technical support, please refer to the product packaging or contact Nova customer service. You can also visit the official Nova Store for additional product information and assistance.
