Diesel DZ4323

Diesel Mega Chief Stainless Steel Men's Watch

Model: DZ4323

INTRODUCTION

The Diesel Mega Chief watch is designed for durability and precision, featuring a robust stainless steel case and a versatile analog or digital movement. This manual provides essential information for setting up, operating, and maintaining your watch to ensure its long-lasting performance.

Figure 1: Front view of the Diesel Mega Chief watch, showcasing its distinctive black iridescent dial and black leather strap.

SETUP

Setting Time and Date

1. **Pull out the crown:** Gently pull the crown (the knob on the side of the watch) to position 2 for setting the date, or position 3 for setting the time.
2. **Adjust the time:** Rotate the crown to move the hour and minute hands to the correct time. For analog-digital

models, ensure both displays are synchronized if applicable.

3. **Adjust the date:** If in position 2, rotate the crown to set the correct date. Avoid setting the date between 9 PM and 3 AM to prevent damage to the movement.
4. **Push in the crown:** Once set, push the crown back into position 1 to start the watch and engage the water resistance seal.

Figure 2: Side view illustrating the watch crown and pushers used for time and date adjustments.

OPERATING THE CHRONOGRAPH

The Diesel Mega Chief features a chronograph function with three sub-dials for precise time measurement.

- **Start/Stop:** Press the top pusher (A) to start and stop the chronograph.
- **Reset:** Press the bottom pusher (B) to reset the chronograph to zero. This can only be done when the chronograph is stopped.
- **Sub-dials:** The three sub-dials typically track minutes, seconds, and 24-hour time, or tenths of seconds, depending on the specific model. Refer to the dial markings for exact functions.

MAINTENANCE AND CARE

Water Resistance

Your Diesel Mega Chief watch is water resistant up to 100 meters (330 feet) or 10 ATM. This means it can be worn for bathing, swimming, snorkeling, and shallow diving. It is not suitable for high-impact water sports or deep-sea diving.

- Always ensure the crown is fully pushed in before exposing the watch to water.
- Do not operate the pushers or crown while the watch is submerged in water.
- After exposure to saltwater, rinse the watch with fresh water and dry it thoroughly with a soft cloth.

General Care

- Clean the watch regularly with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials.
- Protect the watch from extreme temperatures, direct sunlight for prolonged periods, and strong magnetic fields.
- The iridescent mineral crystal face is designed to resist scratches, but avoid unnecessary impacts.
- The black genuine leather band should be kept dry and clean to prolong its life. Avoid prolonged exposure to moisture.

Figure 3: Rear view of the watch, highlighting the durable black leather strap and buckle closure.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Watch stops or loses time	Low battery; Crown not fully pushed in; Impact	Replace battery; Push crown fully in; Consult authorized service center
Date changes at incorrect time	AM/PM not correctly set	Advance time by 12 hours
Chronograph hands do not reset to zero	Needs calibration	Refer to specific movement instructions or consult service center for calibration
Condensation inside crystal	Water ingress; Extreme temperature change	Immediately consult authorized service center

SPECIFICATIONS

- Model Number:** DZ4323
- Case Diameter:** 51mm
- Case Material:** Stainless Steel
- Band Width:** 26mm
- Band Material:** Genuine Leather (Calfskin)
- Movement:** Quartz Chronograph Analog Display with Date Window
- Water Resistance:** 10 ATM (100 meters / 330 feet)
- Crystal:** Iridescent Mineral Crystal
- Product Dimensions:** 1.02 x 2.01 x 0.47 inches
- Item Weight:** 4.76 ounces
- Battery:** 1 Lithium Ion battery (included)
- Country of Origin:** China
