Moen 104541

Moen 104541 Commercial Service Kit Instruction Manual

Essential instructions for installation, maintenance, and product information.

1. PRODUCT OVERVIEW

The Moen 104541 Commercial Service Kit is an authentic Moen replacement part designed to facilitate the repair of problematic plumbing fixtures without requiring a complete replacement. This kit ensures hassle-free installation and is backed by Moen's One-Year Limited Warranty.

Image 1.1: An illustration of the Moen 104541 Commercial Service Kit, showcasing its various components for faucet repair.

2. INSTALLATION TIPS

Follow these critical steps when preparing to remove an existing faucet or disassemble a valve to ensure safety and prevent water damage:

- **Turn Off Water Supply:** Always ensure the main water supply to the faucet or valve is completely turned OFF before beginning any removal or disassembly procedures.
- **Relieve Water Pressure:** Open the faucet handle to relieve any residual water pressure within the lines. This confirms that the water shut-off has been successfully accomplished and prevents unexpected water discharge.

3. OPERATING INSTRUCTIONS

This service kit is designed to replace internal components of a Moen commercial faucet. Once installed, the faucet will operate according to its original design specifications. Refer to your specific faucet model's user manual for detailed operational instructions.

4. MAINTENANCE AND CARE INSTRUCTIONS

Proper care and maintenance will help preserve the finish and functionality of your Moen faucet and its components:

- **Finish Preservation:** To maintain the metallic finish of your Moen faucet, apply a non-abrasive wax, such as car wax, periodically.
- **Cleaning Agents:** If using any cleaning agents, rinse them off immediately with clean water to prevent damage to the finish.
- **Acceptable Abrasives:** Mild abrasives are permissible only on Platinum and LifeShine® finishes. For other finishes, avoid abrasive cleaners.

5. TROUBLESHOOTING

If you encounter issues after installing the service kit, consider the following common troubleshooting steps:

- **Leaking:** Ensure all connections are tightened securely. Check O-rings and gaskets for proper seating and any signs of damage.
- **Low Water Flow:** Verify that the water supply is fully open. Inspect aerators or screens for clogs and clean if necessary.
- **Difficulty Operating Handle:** Confirm that all internal components are correctly aligned and lubricated (if applicable, according to faucet model specifications).

For persistent issues, contact Moen Customer Support or consult a qualified plumber.

6. SPECIFICATIONS

Specification	Detail
Manufacturer	Moen Incorporated
Part Number	104541

Specification	Detail
Item Weight	4.3 ounces
Product Dimensions	4.75 x 9.5 x 2.85 inches
Item Model Number	104541
Color	Chrome
Style	Replacement Part
Finish	Chrome
Item Package Quantity	1
Measurement System	inch
Included Components	Replacement Parts or Service Kit
Batteries Included?	No
Batteries Required?	No
ASIN	B00LGI4OC0
Date First Available	July 2, 2014
