Safety Information

- Always place the scale on a hard, flat, and level surface. Uneven surfaces can affect accuracy.
- Do not use the scale on carpet or soft flooring.
- Ensure the scale is dry before use. Slippery surfaces can cause falls.
- Step onto the center of the scale platform to ensure even weight distribution and accurate readings.
- This scale is designed for personal weight measurement only. Do not use for commercial or medical purposes requiring certified accuracy.
- Keep out of reach of children.

Setup

1. Unpacking and Initial Preparation

Carefully remove the scale from its packaging. Inspect the scale for any visible damage. Before first use, it is crucial to remove any protective packaging materials.

Remove Lock Key: Turn the scale upside down. Locate the shipping lock key, typically found near the center or bottom of the scale's underside. Turn the key as indicated (usually counter-clockwise) and remove it. This key prevents damage during shipping and must be removed for the scale to function correctly.

Remove Cardboard from Base: Ensure any cardboard inserts or protective materials are removed from the base of the scale. These are for packaging purposes only and will interfere with accurate measurement if left in place.

2. Placement

Place the scale on a firm, flat, and level surface. Hard floors such as tile or wood are ideal. Avoid placing the scale on carpets, rugs, or uneven surfaces, as this can lead to inaccurate readings.

3. Initial Calibration (Zeroing the Scale)

Before your first use, and periodically thereafter, you may need to calibrate the scale to ensure the dial reads zero when no weight is applied.

1. Locate the calibration dial or knob, typically found near the bottom of the main dial face.
2. Gently turn this dial until the needle points exactly to the "0" mark.

3. Step off the scale and allow the needle to settle. If it does not return to zero, adjust again.

Operating Instructions

Measuring Your Weight

1. Ensure the scale is on a hard, flat surface and the dial is set to zero.
2. Step onto the scale platform with bare feet, positioning yourself centrally and standing still.
3. Wait for the needle to stabilize. Read the measurement indicated by the needle on the large, easy-to-read dial.
4. Step off the scale. The needle should return to zero. If it does not, recalibrate as described in the Setup section.

Maintenance

Cleaning

To clean your scale, wipe it with a damp cloth and mild detergent. Do not use abrasive cleaners or immerse the scale in water. The powder-coated steel base is designed for durability and easy cleaning.

Storage

Store the scale in a dry place at room temperature. Avoid extreme temperatures or high humidity, which can affect the scale's performance and lifespan.

Troubleshooting

- **Inaccurate Readings:**

- Ensure the scale is on a hard, flat, and level surface.
- Recalibrate the scale to zero before each use or if the needle is not at zero when empty.
- Ensure all packaging materials, including the shipping lock key and cardboard inserts, have been removed.

- **Needle Not Returning to Zero:**
  - Adjust the calibration dial until the needle rests precisely on the "0" mark.
  - Check for any obstructions underneath the scale.
- **Scale Does Not Register Weight:**
  - Verify that the shipping lock key has been fully removed.
  - Ensure you are stepping firmly and centrally onto the platform.
