GIVI S221

GIVI S221 Cable Lock Instruction Manual

Model: S221 | Brand: GIVI

INTRODUCTION

The GIVI S221 Cable Lock is a compact and versatile security device designed to provide an additional layer of protection for your motorcycle accessories, such as helmets and soft bags. Its flexible cable and resettable combination mechanism offer convenient, keyless security for temporary stops or when you need to secure items to your vehicle.

SETUP: SETTING YOUR COMBINATION

Your GIVI S221 Cable Lock comes with a factory preset combination, typically 0-0-0. Follow these steps to set your personalized combination:

1. Ensure the lock is open and set to the current combination (factory default is 0-0-0).
2. Locate the small reset button or lever on the side or bottom of the lock mechanism.
3. Using a pen or a pointed object, press and hold the reset button.
4. While holding the button, rotate the number dials to your desired 3-digit combination. Make sure the numbers are clearly aligned with the indicator line.
5. Release the reset button. Your new combination is now set.
6. Scramble the numbers to lock the device and test your new combination to ensure it opens correctly.

Your browser does not support the video tag.

Video: Demonstration of setting a combination on a similar cable lock. The process involves pressing a reset button and rotating the dials to the desired code. Note that the specific lock model shown in the video may differ in appearance from the GIVI S221, but the combination setting principle is generally the same.

OPERATING INSTRUCTIONS

To use your GIVI S221 Cable Lock:

1. **Unlock:** Align the dials to your preset 3-digit combination. The cable end will release from the lock body.
2. **Secure Item:** Pass the flexible cable through the item you wish to secure. For helmets, thread it through the D-rings or the chin bar opening. For bags, use a sturdy handle or loop.
3. **Attach to Fixed Point:** Loop the cable around a secure, fixed part of your motorcycle or bicycle, such as the handlebar, frame, or a luggage rack.
4. **Lock:** Insert the free end of the cable back into the locking mechanism. Once inserted, scramble the number dials to a random combination to secure the lock.
5. **Verify Security:** Gently pull on the cable and the secured item to ensure the lock is properly engaged and cannot be easily removed.

MAINTENANCE

To ensure the longevity and smooth operation of your GIVI S221 Cable Lock:

- **Cleaning:** Wipe the lock and cable with a soft, damp cloth to remove dirt and grime. Avoid using abrasive cleaners or solvents, as these can damage the finish or internal mechanism.
- **Lubrication:** Periodically apply a small amount of silicone-based lubricant to the locking mechanism and cable entry point to ensure smooth operation of the dials and cable release. Do not over-lubricate.
- **Storage:** Store the lock in a dry environment when not in use to prevent corrosion.
- **Inspection:** Regularly inspect the cable for any signs of fraying, cuts, or damage. If the cable is compromised, replace the lock to maintain security.

TROUBLESHOOTING

- **Lock will not open:**
 - Ensure the correct combination is entered and the numbers are perfectly aligned with the indicator marks.
 - Try rotating the dials slightly back and forth around your combination, as sometimes a dial might be slightly off-center.
- **Cable is stuck or difficult to insert/remove:**
 - Check for any obstructions or debris in the cable entry point.
 - Ensure the lock is fully open (if applicable) before attempting to insert or remove the cable.
 - Apply a small amount of lubricant to the cable end and entry point.
- **Forgotten combination:**
 - Combination locks do not typically have a master key or a way to reset the combination if it is forgotten without knowing the original code. If you have forgotten your combination, you may need to replace the lock.

SPECIFICATIONS

| | |
|---------------------------------|------------------|
| Manufacturer | GIVI |
| Brand | GIVI |
| Model Name | Combination Lock |
