# Vileda Professional Roll O Matic Commercial Sponge Mop Instruction Manual

This manual provides detailed instructions for the assembly, operation, and maintenance of your Vileda Professional Roll O Matic Commercial Sponge Mop.

## PRODUCT OVERVIEW

---

The Vileda Professional Roll O Matic Commercial Sponge Mop is designed for efficient and effective floor cleaning. Its self-wringing mechanism allows for easy moisture control, making it suitable for various floor types.

## COMPONENTS

---

- Mop Handle (Alloy Steel)
- Sponge Head (Blue, replaceable)
- Self-Wringing Mechanism (Rollers and Clip)
- Sponge Channel (Metal bar holding the sponge)

A diagram illustrating the 'Current' and 'Upgraded' designs of the mop head channel, highlighting improvements for better connection.

## SETUP: ATTACHING THE SPONGE HEAD

---

Before first use, attach the sponge head to the mop handle. Ensure you have the correct size sponge refill (10-inch or 14-inch) for your mop handle.

1. Hold the mop handle upright.
2. Align the sponge head's channel directly in the center of the rollers on the mop handle.
3. Apply slight pressure to the top of the sponge head.
4. Slide the clip on the mop handle into the hole on one side of the sponge channel.
5. Once one side is secured, align and secure the other side by sliding the clip into the corresponding hole.
6. Ensure both clips are firmly in place, securing the sponge head to the handle.

An instructional video demonstrating how to properly attach and detach the sponge head refill to the Vileda Roll-O-Matic mop handle. The video shows aligning the sponge channel with the rollers and securing the clips.

## OPERATING INSTRUCTIONS

---

1. **Wetting the Sponge:** Submerge the sponge head in water or a cleaning solution until fully saturated.
2. **Wringing the Sponge:** Pull the handle lever upwards to engage the rollers and squeeze excess water from the sponge. Repeat until desired moisture level is achieved.
3. **Mopping:** Glide the mop across the floor surface to clean. For stubborn spots, apply gentle pressure.
4. **Rinsing:** Periodically rinse the sponge head in clean water to remove dirt and debris.

A person cleaning a wooden floor in a living room using the Vileda sponge mop, highlighting its use on different surfaces.

## MAINTENANCE: REPLACING THE SPONGE HEAD

---

To ensure optimal cleaning performance, replace the sponge head when it shows signs of wear or damage.

1. **Remove Old Sponge:** With the mop handle upright, use your fingers to push in the clips on both sides of the sponge channel. This will release the pressure.
2. Place your thumb on the channel and gently pop off the old sponge head. Dispose of it properly.
3. **Install New Sponge:** Follow the 'Setup: Attaching the Sponge Head' instructions to install a new sponge refill.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Sponge head detaches during use	Improper attachment; clips not fully engaged; incorrect sponge size.	Ensure sponge channel clips are fully secured into the handle's holes. Verify you are using the correct 10-inch or 14-inch refill for your mop handle.
Ineffective wringing	Sponge is worn out; wringing mechanism obstructed.	Replace the sponge head. Check the wringing mechanism for any debris or obstructions.
Mop leaves streaks	Dirty sponge; too much cleaning solution; worn sponge.	Rinse sponge thoroughly. Use less cleaning solution. Replace sponge if worn.

## SPECIFICATIONS

Feature	Detail
Brand	Vileda
Model Numbers	4110, 4114
Item Weight	1.81 pounds
Product Dimensions	10 x 5 x 48 inches
Handle Material	Alloy Steel
Head Material	Sponge
Surface Recommendation	Floor
UPC	074642111004
