## Orbit 58329N

# Orbit Compact 7-Pattern Zinc Pistol Hose Spray Nozzle

Model: 58329N

## PRODUCT OVERVIEW

The Orbit Compact 7-Pattern Nozzle is designed to meet various watering requirements. Its durable zinc construction ensures longevity and consistent performance. The ergonomic rubberized handle provides a comfortable grip, making it suitable for a wide range of yard watering tasks.

Image: A hand holding the Orbit Compact 7-Pattern Zinc Pistol Hose Spray Nozzle, actively spraying water onto a green lawn with flowers in the background, demonstrating its use.

## KEY FEATURES

- **Soft-dial turret guard:** Protects the nozzle and allows for easy pattern selection.
- **Insulated hand grip:** Designed to prevent the handle from becoming too hot or cold during use.
- **High impact metal construction:** Ensures durability and resistance to damage.
- **Self-cleaning turret:** Helps prevent clogs and maintains optimal spray performance.

## SETUP

1. **Inspect Nozzle:** Before first use, visually inspect the nozzle for any signs of damage or manufacturing defects.
2. **Connect to Hose:** Thread the female end of the nozzle onto the male end of your garden hose. Ensure the connection is hand-tight to prevent leaks. Do not overtighten.
3. **Check for Leaks:** Turn on the water supply slowly and check for any leaks at the connection point. If a leak occurs, tighten the connection slightly or ensure a hose washer is properly seated.

## OPERATING INSTRUCTIONS

### Adjusting Spray Patterns

The Orbit Compact 7-Pattern Nozzle features a rotating turret that allows you to select from seven distinct spray patterns. To change the pattern, simply rotate the green turret head until the desired pattern icon aligns with the indicator on the nozzle body.

- **Jet:** A powerful, concentrated stream for cleaning or reaching distant areas.
- **Mist:** A fine, gentle spray ideal for delicate plants or seedlings.
- **Shower:** A soft, wide spray suitable for general watering of plants and gardens.
- **Flat:** A wide, thin sheet of water, effective for rinsing surfaces.

- **Center:** A focused, yet wider spray than 'Jet', good for targeted watering of specific areas.
- **Cone:** A conical spray pattern, providing broad coverage for general watering.
- **Full:** A heavy, wide spray for rapid watering of large areas.

Water Flow Control

To control the water flow, squeeze the pistol-style trigger handle. The flow rate can be adjusted by varying the pressure applied to the trigger. For continuous flow without holding the trigger, engage the trigger lock mechanism, typically a small metal clip or lever near the trigger.

MAINTENANCE

- **Cleaning:** The self-cleaning turret helps prevent mineral buildup. If spray patterns become irregular, rotate the turret through all settings while water is flowing to dislodge any debris.
- **Storage:** After each use, drain any remaining water from the nozzle. Store the nozzle in a dry, protected area, especially during freezing temperatures, to prevent damage from ice expansion.
- **Gasket Inspection:** Periodically check the rubber washer (gasket) inside the hose connection for wear or damage. Replace if necessary to maintain a watertight seal.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Water leaks from hose connection	Loose connection; Damaged or missing hose washer.	Tighten connection; Replace hose washer.
Irregular or weak spray pattern	Debris in nozzle; Low water pressure.	Rotate turret through settings with water flowing; Check water supply pressure.
Trigger is stiff or stuck	Mineral buildup or debris in mechanism.	Flush with water; Apply a silicone-based lubricant if necessary.

SPECIFICATIONS

Attribute	Detail
Material	Metal, Zinc
Item Dimensions (L x W x H)	3 x 3 x 6 inches
Item Weight	6.7 ounces
Number of Spray Patterns	7
Inlet Connection Type	Garden Hose Thread
Model Number	58329N

WARRANTY AND SUPPORT

For information regarding product warranty, returns, or technical support, please refer to the official Orbit website or contact Orbit customer service directly. Keep your purchase receipt for warranty claims.
