## TROUBLESHOOTING

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in; power outage; unit not assembled correctly.	Ensure unit is securely plugged into a working outlet. Check household circuit breaker. Verify blending jar and lid are correctly seated.
Ice is not shaving or blending properly.	Too much ice; ice cubes are too large; ingredients are too thick.	Reduce the amount of ice. Use standard-sized ice cubes. Add more liquid to thin the mixture. Use manual blend function if needed.
Drink consistency is not as desired.	Incorrect pre-set selection; insufficient blending time.	Adjust pre-set program or use manual "Shave" and "Blend" controls to achieve desired texture.
