4. MAINTENANCE

To maintain the chrome finish and ensure the longevity of your Moen T4511 Wynford Transfer Valve Trim, follow these simple maintenance guidelines:

- **Cleaning:** Clean the trim regularly with a soft, damp cloth. For stubborn spots, use a mild soap and water solution.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners, scouring pads, or cleaners containing ammonia, bleach, or alcohol, as these can damage the chrome finish.
- **Drying:** After cleaning, wipe the surface dry to prevent water spots and mineral buildup.
- **Handle Operation:** If the handle becomes stiff over time, a small amount of silicone-based lubricant can be applied to the moving parts, following the rough-in valve's maintenance instructions.
