Polti 505 Pro

Polti Vaporella 505 Pro Steam Generator Iron User Manual

Model: 505 Pro (PLGB0050)

INTRODUCTION

Thank you for choosing the Polti Vaporella 505 Pro Steam Generator Iron. This appliance is designed to provide efficient and professional ironing results. To ensure safe and optimal performance, please read this instruction manual carefully before first use and keep it for future reference.

SAFETY INSTRUCTIONS

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and personal injury.

- Read all instructions before use.
- Do not leave the iron unattended while it is connected to the power supply or while it is hot.
- Do not immerse the iron or its base in water or other liquids.
- Keep the appliance out of reach of children and pets.
- Use the iron only for its intended purpose.
- Always unplug the iron from the electrical outlet before filling with water, emptying, or cleaning.
- The safety cap is designed not to open until the boiler has completely cooled and there is no pressure. Do not attempt to force it open.
- Ensure the power cord is not damaged. If damaged, it must be replaced by the manufacturer or a qualified service agent.
- Do not touch hot surfaces. Use handles or knobs.

PRODUCT COMPONENTS

Familiarize yourself with the main parts of your Polti Vaporella 505 Pro.

- Iron with aluminum soleplate and cork handle
- Steam generator boiler unit
- Safety cap

- Steam hose
- Power cord
- Steam ready indicator light
- Iron temperature control dial

SETUP

Follow these steps for initial setup and before each use.

1. **Placement:** Place the steam generator unit on a stable, heat-resistant surface.
2. **Filling the Boiler:** Ensure the appliance is unplugged and completely cold. Unscrew the safety cap counter-clockwise. Fill the boiler with approximately 0.9 liters of tap water using a funnel. Do not overfill.
3. **Securing the Cap:** Screw the safety cap back on clockwise until it is tightly closed.
4. **Power Connection:** Plug the power cord into a suitable grounded electrical outlet.

OPERATING INSTRUCTIONS

Learn how to effectively use your steam generator iron.

- Heating Up:** Turn the iron's temperature control dial to the desired setting for your fabric type. The iron will begin to heat. The steam generator will also start heating the water.
- Steam Ready Indicator:** Wait for the 'steam ready' indicator light to illuminate, indicating that the boiler has reached the correct pressure (3.5 bar) and the iron is ready for use. This typically takes 10-20 minutes.
- Steam Release:** Press the steam button on the iron handle to release continuous steam. The professional cork handle provides a comfortable grip during use.
- Ironing:** Iron your garments with smooth, even strokes. The 90 g/minute steam output and aluminum soleplate are designed to smooth creases efficiently.
- Refilling (if needed):** If steam production stops, the boiler needs refilling. Unplug the appliance and allow it to cool completely (10-20 minutes) before carefully unscrewing the safety cap and refilling.
- Finishing:** When finished, turn the temperature dial to 'Min' or 'Off', press the steam button to release any remaining steam, and unplug the appliance. Allow it to cool completely before storing.

MAINTENANCE

Proper maintenance ensures the longevity and performance of your iron.

- Cleaning the Soleplate:** Clean the aluminum soleplate with a damp cloth when the iron is cold. Do not use abrasive cleaners or metal scouring pads.
- Descaling (Calc Stop):** The Vaporella 505 Pro is designed to prevent limescale buildup. However, regular descaling is recommended, especially in hard water areas. Refer to the manufacturer's guidelines for specific descaling procedures or use Polti's recommended descaling solution.
- Storage:** Once completely cool, wrap the power cord and steam hose neatly. Store the iron in a dry, safe place.

TROUBLESHOOTING

Refer to this section for common issues and their solutions.

Problem	Possible Cause	Solution
No steam production	Boiler empty or insufficient water; appliance not heated up; safety cap not closed properly.	Refill boiler (after cooling); wait for 'steam ready' light; ensure safety cap is tightly closed.
Water dripping from soleplate	Iron temperature too low for steam; excessive steam usage.	Increase iron temperature; allow iron to heat fully; use steam intermittently.
Iron not heating	Not plugged in; power outlet fault; temperature dial set to 'Off'.	Check power connection; test outlet with another appliance; set temperature dial to desired heat.

If the problem persists after attempting these solutions, please contact Polti customer support.

SPECIFICATIONS

Feature	Detail
Brand	Polti

Feature	Detail
Model Name	505 Pro
Item Model Number	PLGB0050
Pressure	3.5 bar
Steam Output	Up to 90 g/minute
Boiler Capacity	0.9 Liters
Power	1000W
Product Dimensions	35 x 25 x 27 cm
Item Weight	4.1 kg
Color	Gray
Special Feature	Anti-slip
Recommended Use	Ironing
Batteries Required	No
Year of Model	2015

WARRANTY AND SUPPORT

For warranty information, please refer to the warranty card included with your product or visit the official Polti website. For technical support or service, please contact Polti customer service through their official channels.
