SportDOG TEK-2AD

SportDOG TEK Series 2.0 GPS Tracking System Add-A-Dog Collar Instruction Manual

Model: TEK-2AD

Image: The SportDOG TEK Series 2.0 Add-A-Dog Collar, a black and blue waterproof receiver collar with an antenna, designed for GPS tracking and training.

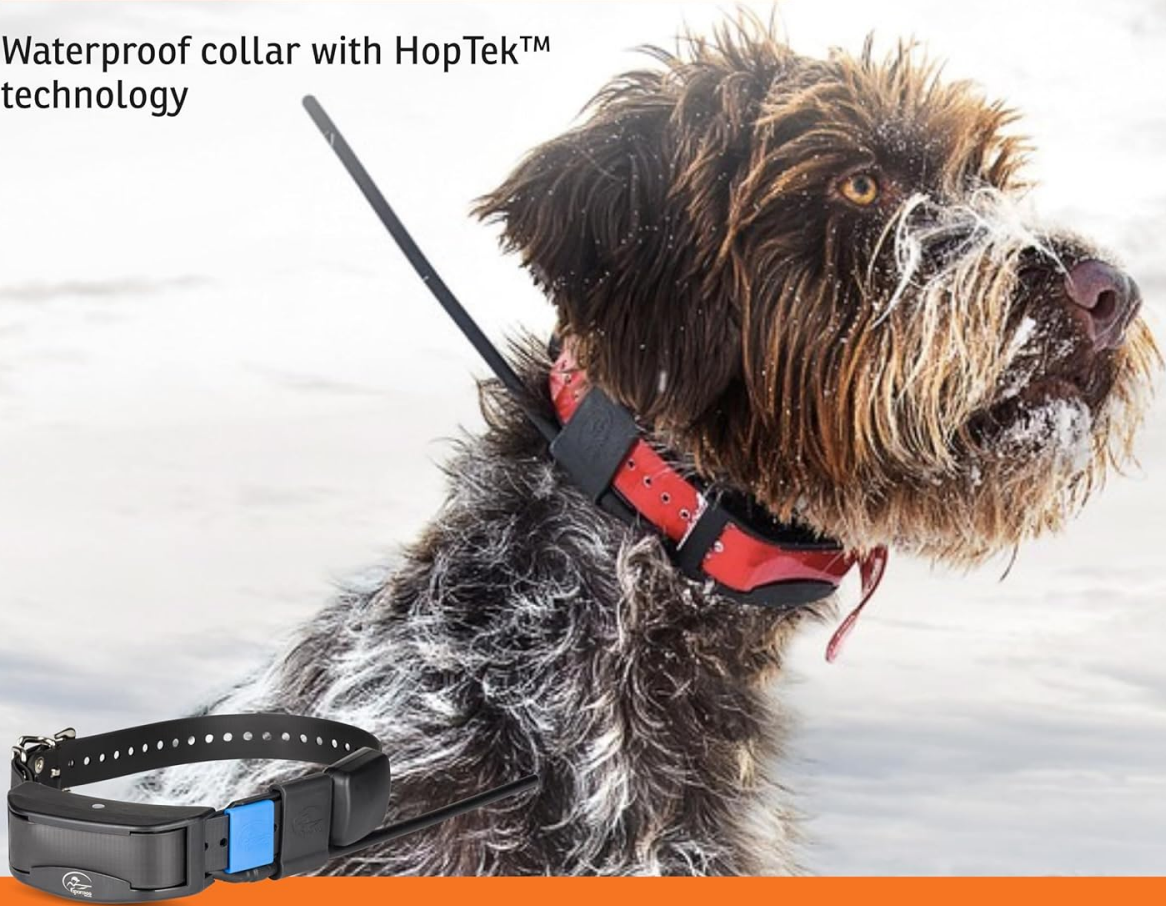

1. INTRODUCTION

The SportDOG TEK Series 2.0 GPS Tracking System Add-A-Dog Collar (Model TEK-2AD) is an expansion collar designed to be used with the SportDOG TEK Series 2.0 GPS Tracking System. This collar allows you to add and accurately track an additional dog, providing real-time location, direction, and status updates. It also features multiple correction modes for remote training, making it a versatile tool for serious hunters and trainers.

RELIABLE TRAINING, ANYTIME, ANYWHERE

Waterproof collar with HopTek™ technology

10-mile range • waterproof to 25 feet

Image: A dog wearing the SportDOG TEK Series 2.0 collar in a snowy outdoor environment, illustrating the collar's waterproof design and suitability for various conditions. The image highlights its 10-mile range and 25-foot waterproof rating.

2. SAFETY INFORMATION

- This product is intended for use with dogs 8 pounds or larger with neck sizes between 10.75 and 23 inches.
- Do not use this product on aggressive dogs.
- Avoid leaving the collar on the dog for more than 12 consecutive hours to prevent skin irritation.
- Regularly check the dog's neck for signs of irritation or sores. If irritation occurs, discontinue use until the skin heals.
- Ensure proper fit; the collar should be snug enough for the contact points to make reliable skin contact, but not so tight as to restrict breathing.
- The collar features a smart safety mechanism that stops continuous correction after 10 seconds.

3. PRODUCT COMPONENTS

The SportDOG TEK Series 2.0 Add-A-Dog Collar package includes:

- TEK Series 2.0 Add-A-Dog Collar Receiver (Model TEK-2AD)
- Charging Cradle
- USB Charging Cable
- Long and Short Contact Points
- Wrench for Contact Points

COLLAR FEATURES

Waterproof + rechargeable

**For dogs
8 lbs. or larger**

Power on / off

**3 stimulation
types (static, vibe, tone)**

Image: A detailed view of the SportDOG TEK Series 2.0 collar, highlighting its key features such as being waterproof and rechargeable, suitable for dogs 8 lbs or larger, and offering power on/off functionality with three stimulation types (static, vibration, tone).

4. SETUP

4.1 Charging the Collar

The collar is powered by a rechargeable lithium-ion battery. Before first use, fully charge the collar. A full charge typically takes 4 hours and provides up to 24 hours of continuous use.

1. Connect the USB charging cable to the charging cradle.

2. Place the collar receiver into the charging cradle, ensuring proper alignment.
3. Plug the USB cable into a standard USB power adapter (not included) or a computer USB port.
4. The charging indicator light on the collar will show charging status (refer to the main TEK Series 2.0 system manual for specific light patterns).

LASTS UP TO 24 HOURS PER CHARGE

Contains rechargeable lithium-ion battery and low battery indicator. Charge for 4 hours.

Image: The SportDOG TEK Series 2.0 collar, emphasizing its long-lasting rechargeable lithium-ion battery that provides up to 24 hours of use per charge, with a recommended 4-hour charging time.

4.2 Attaching Contact Points

Select the appropriate length of contact points (long or short) based on your dog's coat length. Use the provided wrench to securely attach them to the collar receiver.

4.3 Fitting the Collar

Proper collar fit is crucial for effective operation and your dog's comfort.

1. Center the receiver under your dog's neck, ensuring the contact points touch the skin.
2. Adjust the strap so it is snug, allowing only one finger to fit comfortably between the strap and your dog's neck.
3. Trim any excess strap length if necessary.

4.4 Pairing with the Handheld Device

Refer to your main SportDOG TEK Series 2.0 handheld device manual for detailed instructions on pairing this Add-A-Dog Collar. This collar is compatible with TEK Series 1.5 and 2.0 Systems.

Image: A dog wearing the SportDOG TEK Series collar, with text indicating compatibility with TEK Series 1.5 and 2.0 Systems, and suitability for dogs 8 lbs or larger with neck sizes 10.75" - 23".

4.5 Software Updates

For system updates, connect the collar to your computer using the USB cable and utilize the SportDOG desktop application. Consult the main system manual for detailed update procedures.

5. OPERATING INSTRUCTIONS

5.1 Powering On/Off

To power on or off the collar, press and hold the power button on the receiver until the indicator light changes (refer to the main TEK Series 2.0 system manual for specific light patterns).

5.2 Tracking Your Dog

Once paired, the Add-A-Dog Collar transmits location data to your TEK Series 2.0 handheld device. The system utilizes GPS for accurate tracking up to a 10-mile range.

- **Map Display:** View your dog's real-time location on the handheld device's map display. The adjustable scale ranges from 100 yards to 75 miles.
- **Compass:** Use the tilt-compensated compass for directional guidance to your dog.
- **Multiple Dogs:** The system can track up to 21 dogs simultaneously with additional Add-A-Dog collars.

Image: Screen of the SportDOG TEK Series 2.0 handheld device displaying the main menu with a highlighted 'Tracking' option, indicating the primary function of the system.

Image: Screen of the SportDOG TEK Series 2.0 handheld device showing a dog's location marked with a red pin on a topographic map, demonstrating the real-time tracking capability.

Image: Screen of the SportDOG TEK Series 2.0 handheld device displaying a digital compass with directional indicators for

multiple dogs, aiding in navigation and dog retrieval.

Image: Screen of the SportDOG TEK Series 2.0 handheld device showing the tracks of multiple dogs on a map, along with their distances and speeds, illustrating multi-dog tracking functionality.

**EXPANDABLE
SYSTEM**

Train & track up to 21 dogs with
Add-A-Dog® collars.

Image: A dog wearing the SportDOG TEK Series collar, with text highlighting the system's expandability to train and track up to 21 dogs using Add-A-Dog collars.

5.3 Training Modes

The Add-A-Dog Collar supports various training modes controlled by the handheld device:

- **Static Stimulation:** Offers 99 levels of continuous, momentary, and rising stimulation.
- **Vibration:** Provides a non-stimulatory vibration cue.
- **Tone:** Emits an audible tone cue.
- **Safety Feature:** Continuous stimulation automatically stops after 10 seconds to prevent over-correction.

Image: Screen of the SportDOG TEK Series 2.0 handheld device displaying stimulation levels (M, T, V for Momentary, Tone, Vibration) and dog selection, illustrating the control over training modes.

5.4 Geofence Feature

The TEK Series 2.0 system allows you to set up geofences (virtual boundaries) on the handheld device. When your dog enters or exits a defined geofence, you can receive alerts.

Image: Screen of the SportDOG TEK Series 2.0 handheld device showing a red shaded area on a map, representing a geofence boundary, with a dog's location within it.

6. MAINTENANCE

6.1 Cleaning the Collar

Regularly clean the collar receiver and strap with a damp cloth. Avoid harsh chemicals or abrasive cleaners.

6.2 Battery Care

To prolong battery life, avoid fully discharging the battery frequently. Recharge the collar when the low battery

indicator appears. Store the collar in a cool, dry place when not in use for extended periods.

6.3 Checking Contact Points

Periodically inspect the contact points for wear or damage. Replace them if necessary to ensure consistent contact with your dog's skin.

6.4 Waterproofing

The collar is DRYTEK waterproof and submersible up to 25 feet. Ensure the charging port cover is securely closed before exposing the collar to water.

Image: A dog wearing the SportDOG TEK Series collar, illustrating the product's durability and features like an adjustable nylon strap, Drytek waterproofing up to 25 feet, and a smart safety feature that limits continuous correction to 10 seconds.

7. TROUBLESHOOTING

If you encounter issues with your SportDOG TEK Series 2.0 Add-A-Dog Collar, consider the following:

- **Collar not powering on:** Ensure the battery is fully charged.
- **No signal from collar:** Verify the collar is powered on and within range of the handheld device (up to 10 miles in optimal conditions). Check for obstructions that might interfere with GPS or radio signals.

- **Inconsistent tracking:** Ensure the collar has a clear view of the sky for GPS reception.
- **Correction not working:** Check that the contact points are making proper skin contact. Ensure the stimulation level is set appropriately on the handheld device.
- **Skin irritation:** Re-evaluate collar fit and wear time. Ensure contact points are clean.

For further assistance, refer to the comprehensive troubleshooting guide in your main TEK Series 2.0 system manual or contact customer support.

8. SPECIFICATIONS

Feature	Detail
Model Number	TEK-2AD
Compatibility	SportDOG TEK Series 2.0 (and 1.5) GPS Tracking Systems
Dog Size	8 lbs or larger
Neck Size	10.75 - 23 inches
Range	Up to 10 miles
