Viking Security Safe VS-25BL

Viking Security Safe VS-25BL User Manual

Model: VS-25BL | Brand: Viking Security Safe

INTRODUCTION

This manual provides essential information for the safe and efficient operation of your Viking Security Safe VS-25BL. Please read this manual thoroughly before using the safe and retain it for future reference.

The Viking Security Safe VS-25BL is a heavy-duty biometric fingerprint safe designed for securing valuables, documents, and firearms. It features multiple access methods including biometric fingerprint, PIN code, and a backup key.

SAFETY PRECAUTIONS

- Do not store the backup keys inside the safe. Keep them in a secure location known only to trusted individuals.
- Ensure the safe is securely mounted to prevent unauthorized removal.
- Keep the safe away from excessive moisture or extreme temperatures.
- Do not attempt to force the safe open if the electronic lock fails. Use the backup key.
- Regularly check battery levels to ensure continuous operation.

SETUP AND INITIAL USE

1. Battery Installation

The safe requires 6 'A' batteries (included). Locate the battery compartment, typically on the inside of the door or rear panel. Insert the batteries, ensuring correct polarity. The LCD display will show the battery level.

2. Setting Your PIN Code

1. With the safe door open, press the 'Reset' button located inside the safe.
2. Enter your desired 4-9 digit PIN code on the keypad.
3. Press the '#' key to confirm. The safe will beep to confirm successful programming.

4. Test the new PIN code with the door open to ensure it works correctly before closing the safe.

3. Registering Fingerprints

The safe can store up to 32 fingerprints. For optimal performance, register your fingerprint multiple times from different angles.

1. With the safe door open, press the 'Reset' button.
2. Place your finger on the optical fingerprint sensor. The LCD will guide you through the scanning process.
3. Lift and re-place your finger as prompted until the registration is complete.
4. Repeat for additional fingerprints or for the same finger at different angles.
5. Test registered fingerprints with the door open to ensure they work correctly.

Battery Indicator. Shows level of charge.

500 DPI Optical Sensor. (NOT Semiconductor) Complies with FBI systems requirements.

Keypad. You can set up 4-9 digits PIN Code.

Unlocks with fingerprint in fraction of a second.

LCD displays different functions.

False Entry Protection.

OPERATING INSTRUCTIONS

Opening the Safe

- **Using Fingerprint:** Place a registered finger on the fingerprint sensor. The safe will unlock if the fingerprint is recognized.
- **Using PIN Code:** Enter your 4-9 digit PIN code on the keypad, then press '#'. The safe will unlock if the code is correct.
- **Using Backup Key:** In case of battery failure or forgotten codes, insert the backup key into the hidden keyhole and

turn it to unlock.

Closing and Locking the Safe

Simply close the door. The motorized deadbolt mechanism will automatically engage, securing the safe. Ensure the door is fully closed for the lock to activate.

MAINTENANCE

Battery Replacement

When the battery indicator on the LCD display shows low power, replace all 6 'A' batteries immediately. Do not mix old and new batteries. Use high-quality alkaline batteries for best performance.

Cleaning

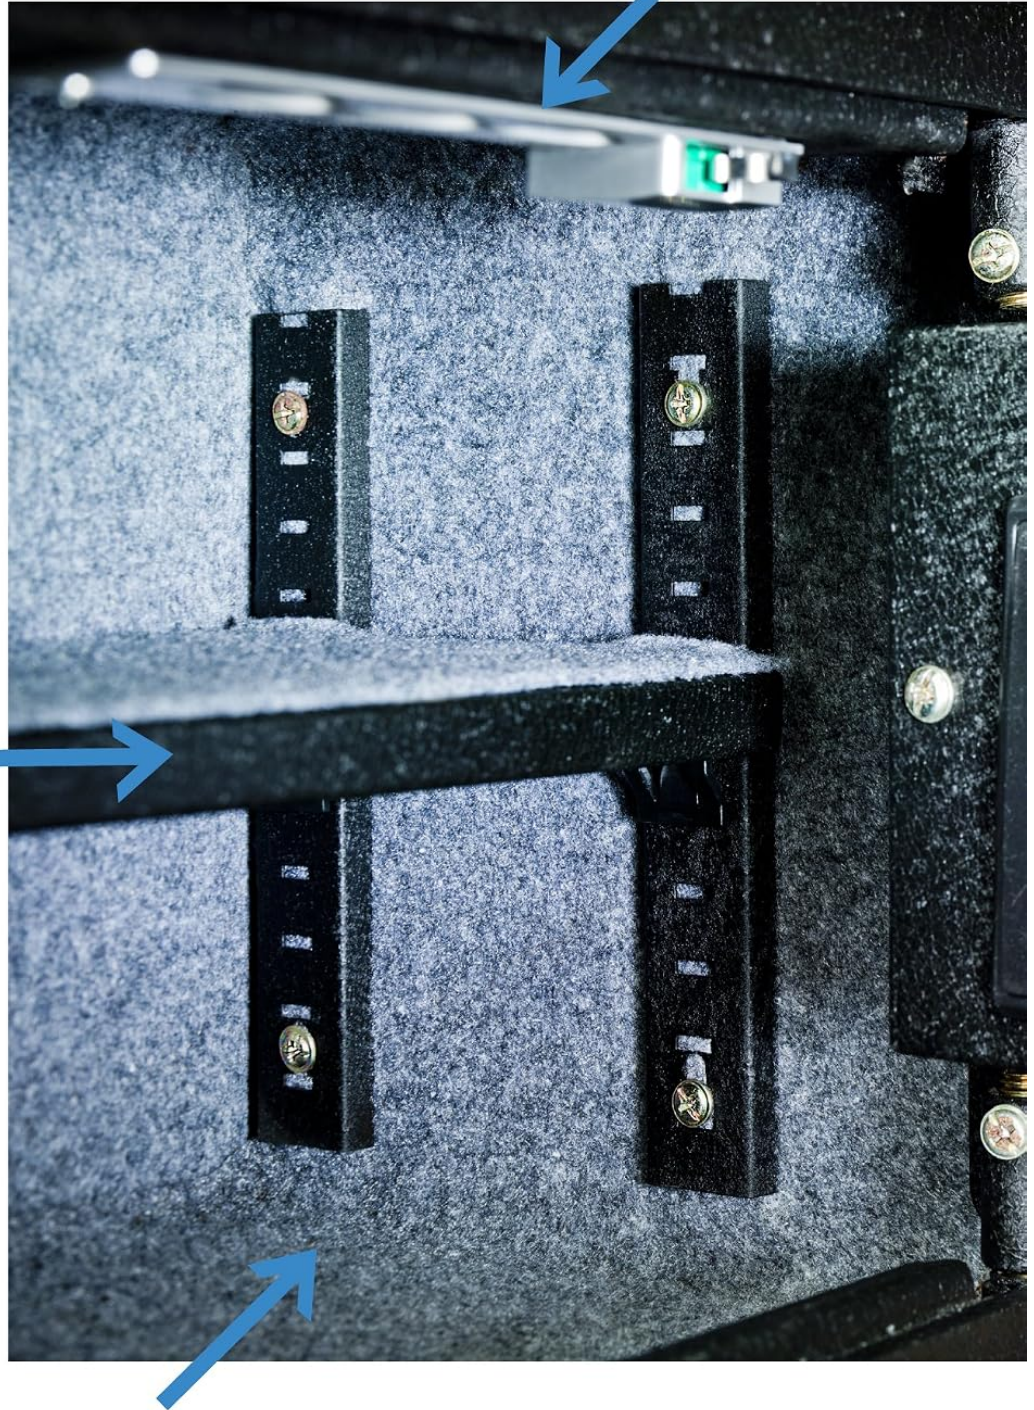

Wipe the exterior of the safe with a soft, damp cloth. Avoid using abrasive cleaners or solvents that could damage the finish or electronic components. Keep the fingerprint sensor clean and free of debris for accurate readings.

Interior Features

The safe features a fully carpeted interior and an adjustable shelf for organizing contents. An internal LED light illuminates the interior when the door is opened.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Safe does not open with fingerprint.	Fingerprint not registered, dirty sensor, or improper placement.	Ensure finger is clean and dry. Re-register fingerprint from multiple angles. Clean the sensor. Try another registered finger or PIN code.
Safe does not open with PIN code.	Incorrect PIN entered, or batteries are low/dead.	Verify the PIN code. Replace batteries. Use the backup key if necessary.
LCD display is blank or dim.	Low or dead batteries.	Replace all batteries immediately.
Safe beeps continuously when door is open.	Door left unlocked or ajar.	Close the door completely. The warning beep can be turned on/off via settings.
