National Tree Company 10 ft Pre-Lit Dunhill Fir Artificial Christmas Tree Instruction Manual

Model: DUH-330LD-10S

PRODUCT OVERVIEW

This manual provides detailed instructions for the assembly, operation, and maintenance of your National Tree Company 10 ft Pre-Lit Dunhill Fir Full Artificial Christmas Tree. Designed for ease of use and durability, this tree features PowerConnect technology and Dual Color LED lights.

Image: The National Tree Company 10 ft Pre-Lit Dunhill Fir Artificial Christmas Tree, fully assembled and lit with warm white lights.

- **Height:** 10 feet
- **Base Diameter:** 70 inches
- **Branch Tips:** 5,090 individually crafted tips for a full, lifelike appearance.
- **Lighting:** 1,200 Dual Color LED lights with 10 light functions.
- **Technology:** PowerConnect system for easy assembly without extra cords between sections.
- **Construction:** Hinged branches for simple setup and storage, sturdy metal base, hypo-allergenic, fire-resistant needles.

SETUP INSTRUCTIONS

1. **Unpack Components:** Carefully remove all tree sections and the metal stand from the packaging. Ensure all parts are present.
2. **Assemble the Stand:** Unfold the metal tree stand and secure it with the provided eyebolt. Place the stand in your

desired location, ensuring it is on a flat, stable surface.

3. **Insert Bottom Section:** Place the largest tree section (Section 1) into the assembled stand. Tighten the eyebolt on the stand to secure the tree trunk.
4. **Connect Middle Sections:** Proceed to connect the subsequent sections (Section 2, Section 3) from bottom to top. The PowerConnect system integrates the lighting wires directly into the pole, eliminating the need for manual light string connections between sections.
5. **Insert Top Section:** Carefully place the smallest tree section (Section 4) onto the top of the tree.
6. **Shape the Branches:** The tree features pre-attached, hinged branches that will fall into place. Gently pull the branches downwards and spread out the individual tips to create a full, natural appearance. This process may take 45-60 minutes for optimal results.

EASY ASSEMBLY & SHAPING

STEP 1

Unfold the stand
and secure with
the eyebolt

STEP 2

Connect the sections
from bottom to top

PowerConnect

STEP 3

Shape the
branches into
place for
fullness

Video: A detailed unboxing and assembly guide for a 9-foot National Tree Company artificial Christmas tree, demonstrating the PowerConnect system and branch shaping.

OPERATING INSTRUCTIONS

Your tree is equipped with Dual Color LED lights and a foot pedal for easy control of light functions.

- **Power On/Off:** Locate the foot pedal at the base of the tree. Press the pedal once to turn the lights on or off.
- **Change Light Functions:** The Dual Color LED lights can switch between white and multicolor settings. Repeatedly press the foot pedal to cycle through 10 different light functions, including twinkling, flashing, or fading effects on either color setting.

Video: A demonstration of the dual light modes (warm white and multicolor) and various light functions on a 7.5 ft National Tree Company pre-lit tree.

MAINTENANCE

- **Shaping:** For optimal appearance, re-shape the branches each year after assembly. Gently spread out the branch tips to fill any gaps and achieve desired fullness.
- **Cleaning:** Dust the tree periodically with a soft, dry cloth. Do not use liquid cleaners.
- **Storage:** The hinged branches fold back in for convenient storage. Disassemble the tree into its sections and store them in the original box or a suitable tree storage bag in a cool, dry place.
- **Safety:** The tree is constructed with fire-resistant needles. However, always keep the tree away from open flames or heat sources.

TROUBLESHOOTING

- **Lights Not Working:**
 - Ensure the tree is properly plugged into a working power outlet.
 - Verify that all tree sections are correctly connected, as the PowerConnect system relies on proper pole alignment for power transmission.
 - Check the foot pedal for proper function.
 - Individual LED bulbs operate independently. If a bulb is not working, the rest of the light set should remain illuminated, provided the bulb lens is not cracked or broken. Replace any non-working bulbs as needed.
- **Tree Appears Sparse:** This is typically resolved by thorough branch shaping. Dedicate sufficient time (45-60 minutes) to carefully spread and fluff each branch and its individual tips.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	National Tree Company
Model Number	DUH-330LD-10S
Product Dimensions	70"D x 70"W x 120"H (10 ft tall)
Color	Green
Material	Polyvinyl Chloride (PVC)
Item Weight	90.2 Pounds
Tip Count	5090
Built-in Light Type	Dual Color LED
Light Count	1200
Special Features	Pre-lit, Hinged Branches, PowerConnect System
Included Components	Metal Stand

WARRANTY AND SUPPORT
