SentrySafe CFW20201

SentrySafe Fireproof and Waterproof Safe User Manual

Model: CFW20201 | Brand: SentrySafe

Introduction

The SentrySafe CFW20201 is a fireproof and waterproof safe designed to protect your important documents, digital media, and valuables from fire and water damage. This robust chest offers unparalleled protection, ensuring your items remain intact even in unexpected disasters. Its privacy key lock keeps contents secure, and the integrated carrying handle allows for easy transport. This manual provides detailed instructions for the proper use and care of your SentrySafe product.

Image: SentrySafe CFW20201 with lid open, showing various items stored inside.

Key Features

- **Fire Resistant:** UL Classified to survive in a fire for one hour at 1700 degrees Fahrenheit (927 degrees Celsius), keeping interior temperature below 350 degrees Fahrenheit (177 degrees Celsius).

Image: Safe highlighting its 1-hour fireproof rating.

- **Waterproof:** ETL Verified for 72 hours of protection in water up to 8 inches (20.3 cm) deep, safeguarding against flood damage.

Image: Safe highlighting its 72-hour waterproof rating.

- **Privacy Key Lock:** Equipped with a tubular key lock to deter unwanted access and ensure the lid remains closed during a fire. Two keys are included.
- **Digital Media Protection:** ETL Verified for the protection of USB drives, CDs, DVDs, and portable hard drives.
- **Carrying Handle:** Convenient grips for easy transportation and portability.
- **Compact Interior:** Designed to hold letter-size files flat.

Setup

Unpacking and Placement

1. Carefully remove the safe from its packaging. Inspect for any signs of damage.
2. Place the safe on a flat, stable surface. Ensure it is in a location where it will not be easily disturbed or fall.

3. Keep the safe away from direct heat sources or areas with extreme temperature fluctuations to maintain optimal performance and longevity.
4. Store the keys in a secure location away from the safe itself. It is recommended to keep one key as a spare in a separate, safe place.

Operating Instructions

Using the Key Lock

The SentrySafe CFW20201 utilizes a tubular key lock for security. Follow these steps to open and close your safe:

1. **To Open:** Insert one of the provided tubular keys into the keyhole on the front of the safe. Turn the key clockwise approximately a quarter turn until the lock mechanism disengages. Lift the lid to open the safe.
2. **To Close:** Ensure the lid is properly aligned with the base of the safe. Press down firmly on the lid until it clicks into place. Insert the key and turn it counter-clockwise to lock the safe. Remove the key.

Tubular Key Lock Provides Added Security

Image: Safe highlighting the tubular key lock for added security.

Important: Do not store the keys inside the safe. In case of fire or flood, you would not be able to access them.

Maintenance

- **Cleaning:** Clean the exterior of the safe with a soft, damp cloth. Avoid using abrasive cleaners or solvents, as these can damage the finish.
- **Seal Inspection:** Periodically inspect the waterproof seal around the rim of the safe. Ensure it is free from debris, cracks, or damage. A clean, intact seal is crucial for maintaining waterproof integrity.
- **Key Care:** Keep the keys clean and dry. Do not force the key if it feels stiff; a small amount of graphite lubricant can be applied to the key if necessary.
- **Storage Environment:** Store the safe in a dry environment to prevent moisture buildup, which could affect the contents or the safe's materials over time.

Troubleshooting

Problem	Possible Cause	Solution
Key does not turn or is stiff.	Debris in keyhole, worn key, or lack of lubrication.	Ensure key is fully inserted. Try the spare key. Apply a small amount of graphite lubricant to the key and insert it into the lock.
Lid does not close completely.	Obstruction in the safe, or seal is misaligned/damaged.	Check for items blocking the lid. Inspect the waterproof seal for any foreign objects or damage. Clean and realign the seal if necessary.

Problem	Possible Cause	Solution
Safe feels damp inside.	High humidity in storage area, or seal issue.	Ensure the safe is stored in a dry environment. Verify the waterproof seal is clean and intact. Consider using a desiccant packet inside the safe if humidity is a persistent issue.

Specifications

Attribute	Value
Brand	SentrySafe
Model Number	CFW20201
Exterior Dimensions (H x W x D)	6.6 in. H x 15.4 in. W x 14.3 in. D (16.8 cm H x 39.1 cm W x 36.3 cm D)
Interior Dimensions (H x W x D)	4.4 in. H x 12.8 in. W x 8.5 in. D (11.2 cm H x 32.5 cm W x 21.6 cm D)
