

Omron HEM-907-CR19

Omron HEM-907-CR19 Intellisense Digital Automatic Blood Pressure Monitor Cuff/Bladder Set User Manual

Model: HEM-907-CR19

1. INTRODUCTION

This manual provides essential instructions for the proper use and maintenance of your Omron HEM-907-CR19 Intellisense Digital Automatic Blood Pressure Monitor Cuff/Bladder Set. Please read this manual thoroughly before using the product to ensure safe and effective operation. Keep this manual for future reference.

2. IMPORTANT SAFETY INFORMATION

Always consult your physician for specific medical advice. Self-diagnosis and treatment based on measurement results can be dangerous. Follow these general safety guidelines:

- Do not use this cuff on infants or individuals who cannot express consent.
- Ensure the cuff size is appropriate for the user's arm circumference (22-32cm or 9-13 inches).
- Do not apply the cuff over a wound or injured area.
- Avoid excessive bending or kinking of the air tube.
- Use only with compatible Omron blood pressure monitors.
- Keep out of reach of children.

3. PACKAGE CONTENTS

Verify that all components are present in the package:

- Omron HEM-907-CR19 Intellisense Blood Pressure Monitor Cuff/Bladder Set (Medium, 22-32cm)
- Instruction Manual

Figure 1: Omron HEM-907-CR19 Blood Pressure Cuff. This image displays the dark blue Omron blood pressure cuff with white text indicating "OMRON", "22~32cm (9\"~13\")", and "REF HEM-CR19". An illustration of an arm with the cuff applied is also visible, along with the air tube extending from the cuff.

4. SETUP AND CUFF APPLICATION

1. **Connect the Air Tube:** Insert the air plug of the cuff firmly into the air jack on your compatible Omron blood pressure monitor. Ensure a secure connection.
2. **Prepare for Measurement:** Sit in a chair with your feet flat on the floor. Rest your arm on a table so the cuff will be at heart level.
3. **Apply the Cuff:**
 - Slide your arm through the cuff loop. The air tube should run down the inside of your arm.
 - Position the cuff so the bottom edge is approximately 1 to 2 cm (0.4 to 0.8 inches) above your elbow.
 - The "INDEX" arrow on the cuff should align with the center of your inner arm, over the brachial artery.
 - Wrap the cuff snugly around your arm using the fabric fastener. Ensure it is not too tight or too loose. The "RANGE" indicator should fall within the acceptable range for your arm circumference.

5. OPERATING INSTRUCTIONS (CUFF USAGE)

This cuff is an accessory for an automatic blood pressure monitor. Refer to your specific Omron blood pressure monitor's instruction manual for complete operating procedures. The general steps for using the cuff are:

1. **Preparation:** Ensure the cuff is correctly applied to your arm as described in Section 4. Remain still and quiet before and during the measurement.
2. **Start Measurement:** Press the START button on your blood pressure monitor. The cuff will begin to inflate automatically.
3. **During Measurement:** Do not talk or move during the measurement process.
4. **Completion:** Once the measurement is complete, the cuff will deflate, and your blood pressure readings will be displayed on the monitor.
5. **Remove Cuff:** Remove the cuff from your arm.

6. MAINTENANCE AND CARE

- **Cleaning:** Wipe the cuff with a soft, dry cloth. If necessary, use a soft cloth moistened with water and a mild soap, then wipe dry. Do not wash the cuff in a washing machine or immerse it in water.
- **Storage:** Store the cuff in a clean, dry place away from direct sunlight, extreme temperatures, and humidity. Avoid folding the air tube tightly.
- **Inspection:** Regularly inspect the cuff and air tube for any signs of damage, cracks, or wear. If damage is found, replace the cuff.

7. TROUBLESHOOTING

If you experience issues with the cuff, refer to the troubleshooting section of your Omron blood pressure monitor's main instruction manual. Common cuff-related issues and their solutions include:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Cuff does not inflate or inflates improperly.	Air tube not securely connected. Cuff is damaged or has a leak.	Ensure the air tube is firmly inserted into the monitor. Inspect the cuff for damage; replace if necessary.
Error message related to cuff on monitor.	Cuff applied incorrectly (too loose/tight). Incorrect cuff size for arm.	Reapply the cuff snugly, ensuring proper positioning. Verify arm circumference matches cuff size (22-32cm).

8. SPECIFICATIONS

- **Product Name:** Intellisense Digital Automatic Blood Pressure Monitor Cuff/Bladder Set
- **Model:** HEM-907-CR19
- **Cuff Type:** Arm Cuff
- **Arm Circumference:** Medium, 22-32 cm (9-13 inches)
- **Material:** Nylon, PVC (bladder)
- **Compatibility:** Designed for use with compatible Omron automatic blood pressure monitors.

9. WARRANTY AND CUSTOMER SUPPORT

For warranty information and customer support, please refer to the documentation included with your main Omron blood pressure monitor unit or visit the official Omron website. Keep your purchase receipt as proof of purchase for warranty claims.

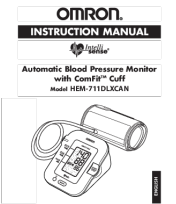

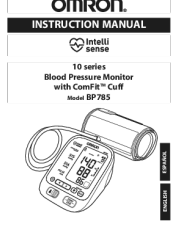

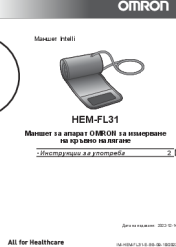

Omron Customer Service: For assistance, please contact Omron customer support through their official website or the contact information provided in your main monitor's manual.
