KISS KACI01

KISS Instawave Deluxe Automatic Rotating Curling Iron Instruction Manual

Model: KACI01

PRODUCT OVERVIEW

The KISS Instawave Deluxe Automatic Rotating Curling Iron is designed to simplify your hair styling routine. This innovative tool features self-spinning technology and ceramic ionic plates to create smooth, frizz-free curls with ease. Its 2-way rotation and tangle prevention design ensure a stress-free experience, while dual heat settings cater to various hair types.

Safety Information

- Keep out of reach of children.
- To reduce the risk of death by electric shock:
 - a. Always unplug the appliance immediately after using.
 - b. Do not use while bathing.
 - c. Do not place or store the appliance where it can fall or be pulled into a tub or sink.
 - d. Do not place in or drop into water or other liquid.
 - e. If an appliance falls into water, unplug it immediately. Do not reach into the water.

SETUP

Before Use

- Ensure hair is clean, completely dry, and combed before using this curling tool.
- Plug the device into a suitable power outlet.

Heat Settings

The Instawave Deluxe offers dual heat settings to accommodate different hair types and desired curl tightness:

- **Low Setting:** Ideal for fine or delicate hair, or for looser waves.
- **High Setting:** Reaches up to 420°F (215°C), suitable for thicker hair or tighter curls.

Select one of the two heat settings using the switch on the handle. The power indicator light will turn red while heating and blue when ready for use.

OPERATING INSTRUCTIONS

Curling Your Hair

1. **Prepare Hair:** Ensure your hair is clean, completely dry, and combed. Section your hair into 1 to 2-inch strands.
2. **Position the Curler:** Place a section of hair between the prongs of the patented Curl Dial. Position the barrel where you want the curl to begin.
3. **Select Curl Direction:** Press and hold the button corresponding to your desired curl direction. The arrow pointing away from your face will curl outwards, and the arrow pointing towards your face will curl inwards.
4. **Automatic Curling:** The Curl Dial will automatically begin catching and curling your hair around the barrel. Your hands are never near the hot iron, eliminating the need for a heat-resistant glove.
5. **Hold and Release:** Continue pressing the button until your hair is fully wrapped around the barrel. The device will beep to indicate the curl is set (typically 3-5 seconds for loose curls on LOW, 4-8 seconds for medium curls on LOW or HIGH, and 6-10 seconds for tighter curls on HIGH). Release the button to lock the curl in place, then gently pull the iron straight down to release the curl.

6. **Repeat:** Continue this process for the rest of your hair to achieve your desired hairstyle.

Tips for Best Results

- For tighter curls, use smaller sections of hair and hold the button for a longer duration on a higher heat setting.
- For looser waves, use larger sections of hair and hold the button for a shorter duration on a lower heat setting.
- Allow curls to cool completely before styling or brushing to help them set and last longer.

MAINTENANCE

Cleaning Instructions

- Always unplug the appliance and allow it to cool completely before cleaning.
- Wipe the surfaces clean with a soft, damp cloth.
- Do not use abrasive cleaners or harsh chemicals, as these can damage the ceramic coating.
- Ensure the appliance is completely dry before storing or next use.

TROUBLESHOOTING

- **Device not heating:** Ensure the device is properly plugged in and the power switch is turned on. Check if the indicator light is red (heating) or blue (ready).
- **Hair not curling effectively:** Ensure hair is completely dry and free of tangles. Use smaller sections of hair. Adjust to a higher heat setting or hold the hair on the barrel for a longer duration.

- **Hair tangling:** Ensure hair is thoroughly combed and free of knots before curling. Use smaller, manageable sections. The device features tangle prevention, but excessive hair or knots can still cause issues.
- **Auto Shut-Off:** For your safety, the device has an auto shut-off feature after 90 minutes of inactivity. If the device turns off unexpectedly, simply turn it back on.

SPECIFICATIONS

Feature	Detail
Model Number	KACI01
Product Dimensions	5.5 x 2.75 x 2.75 inches
Item Weight	1.38 Pounds
Material Type	Ceramic
Heater Surface Material	Ceramic
Max Temperature Setting	420 Degrees Fahrenheit
Power Source	Corded Electric
