3. OPERATING INSTRUCTIONS

Taking a Temperature Reading:

1. Press the power button to turn on the thermometer.
2. Position the thermometer's lens approximately 1/2 inch (1.27 cm) from the center of the forehead. Ensure the lens is aimed directly at the forehead, not downward toward the nose.
3. Press the measurement button. The thermometer will beep once the reading is complete (approximately 1 second).
4. Read the temperature displayed on the screen. The display will show the temperature in large numerals, along with a fever icon if a high temperature is detected.

4. CARE AND MAINTENANCE

Cleaning:

- Wipe the thermometer clean with a soft, dry cloth after each use.
- Do not use abrasive cleaners or immerse the thermometer in water.

Storage:

- Store the thermometer in a dry place, away from direct sunlight and extreme temperatures.
- Remove batteries if the thermometer will not be used for an extended period.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
No display or weak display	Low or dead batteries, incorrect battery installation.	Replace batteries with new AAA batteries, ensuring correct polarity.
Inaccurate readings	Improper positioning, dirty sensor lens, extreme ambient temperature.	Ensure correct positioning (1/2 inch from forehead, not angled). Clean the sensor lens gently with a soft cloth. Allow thermometer to acclimate to room temperature for 30 minutes before use.
Thermometer does not turn on	Batteries are not installed or are dead.	Install new AAA batteries.
