SETUP

The Wiha SoftFinish Grip Screwdriver Set requires no assembly. Upon receiving the set, inspect each screwdriver for any

signs of damage. Ensure the tips are clean and free from debris before first use.

- **Inspection:** Visually check each screwdriver for any manufacturing defects or shipping damage.
- **Storage:** Store the screwdrivers in a dry environment to prevent corrosion. The original packaging or a tool roll is recommended for organized storage.

OPERATING INSTRUCTIONS

Using the Wiha SoftFinish screwdrivers correctly ensures efficiency and prevents damage to fasteners or the tool.

1. **Select the Correct Tip:** Always match the screwdriver tip type (Slotted, Phillips, Square) and size to the fastener head. Using an incorrect size or type can strip the fastener head or damage the screwdriver tip.
2. **Insert the Tip:** Place the screwdriver tip firmly into the fastener head, ensuring full engagement.
3. **Apply Pressure and Turn:** Apply downward pressure on the handle while turning the screwdriver clockwise to tighten or counter-clockwise to loosen. The SoftFinish handle is designed to provide maximum grip and comfort, reducing hand fatigue.
4. **Maintain Alignment:** Keep the screwdriver shaft aligned with the fastener to prevent cam-out and damage.
5. **Safety Precautions:**
 - Do not use screwdrivers as pry bars, chisels, or punches.
 - Do not strike the handle with a hammer or other object.
 - Wear appropriate eye protection when using hand tools.
 - Ensure the workpiece is stable and secure before applying torque.

MAINTENANCE

Proper maintenance extends the life of your Wiha screwdrivers and ensures continued performance.

- **Cleaning:** After each use, wipe the screwdriver shafts and tips clean with a dry cloth to remove dirt, grease, or debris.
- **Storage:** Store screwdrivers in a clean, dry place, away from excessive moisture or corrosive chemicals. Keeping them organized prevents damage to the tips.
- **Inspection:** Periodically inspect the tips for wear or damage. A worn tip can slip and damage fasteners. Replace damaged screwdrivers as necessary.
- **Rust Prevention:** If storing for extended periods in humid conditions, a light coat of rust-preventative oil on the metal shafts can be beneficial.
