- **Stopping:** Press the 'OFF' button (or disengage the switch) to stop the motor. Always wait for the blades to come to a complete stop before performing any actions near the feed chute or discharge.

5.3 Feeding Material

- **Material type:** The VBI 2400 W2400 is designed for shredding garden waste such as branches, leaves, and small plant debris. Do not attempt to shred metal, plastic, stones, or other non-organic materials.
- **Branch size:** Do not exceed the maximum recommended branch diameter (refer to specifications). Feed branches slowly, butt-end first.
- **Use the pusher:** Always use the provided pusher tool to feed material into the chute. **Never use your hands or feet.**
- **Avoid overloading:** Feed material gradually to prevent the motor from stalling or the shredder from jamming.

6. MAINTENANCE

Regular maintenance ensures the safe and efficient operation of your shredder.

6.1 Cleaning

- **Disconnect power:** Always unplug the shredder before cleaning.
- **Clear debris:** After each use, clear any accumulated debris from the feed chute, discharge chute, and around the motor housing. Use a brush or a wooden stick.
- **Do not use water:** Never spray water directly onto the shredder or immerse it in water. Wipe external surfaces with a damp cloth.
