SETUP AND ASSEMBLY

Assembly of the Vollmer 43550 Platform "Wiesental" Railway Buildings requires careful attention to detail. Follow these steps:

1. **Preparation:** Clear a well-lit, clean workspace. Gather necessary tools such as a hobby knife, plastic cement, small files, and tweezers.
2. **Part Identification:** Carefully detach all parts from their sprues. Use the provided diagram to identify each component. Smooth any rough edges with a hobby knife or file.
3. **Base Assembly:** Begin by assembling the main platform base. Ensure all interlocking tabs and slots align correctly before applying plastic cement.
4. **Wall and Roof Sections:** Attach the wall sections to the base, ensuring they are plumb and square. Follow the numerical sequence in the kit's diagram for correct placement. Secure roof sections last.
5. **Detailing:** Add smaller details such as windows, doors, benches, and signage. Refer to the instruction diagrams for precise placement.
6. **Finishing:** Allow all adhesive to dry completely. The model can then be painted and weathered according to personal preference.

Note: For best results, apply plastic cement sparingly to avoid damaging the plastic surface.

- **Scenery Integration:** Blend the platform into the surrounding scenery using ballast, ground cover, and miniature figures to enhance realism.

MAINTENANCE

To ensure the longevity and appearance of your Vollmer 43550 model, follow these maintenance guidelines:

- **Dusting:** Regularly dust the model with a soft brush or compressed air to prevent dust buildup, which can obscure details.
- **Cleaning:** If necessary, gently wipe surfaces with a slightly damp cloth. Avoid harsh chemicals or abrasive cleaners, as these can damage paint or plastic.
- **Storage:** If storing the model, keep it in a cool, dry place away from direct sunlight to prevent warping or fading.

TROUBLESHOOTING

Encountering issues during assembly or with the finished model?

- **Parts Not Fitting:** Double-check the part numbers against the diagram. Ensure any excess plastic (flash) has been removed from the parts.
- **Adhesive Issues:** Ensure you are using the correct type of plastic cement for polystyrene models. Allow adequate drying time.
