PRODUCT FEATURES

- **Compact Design:** This 2.1 cu ft washer is designed to handle significant loads while maintaining a small footprint, ideal for various living spaces. It weighs approximately 100 lbs and features wheels for easy mobility. Dimensions are 21 x 22 x 36 inches.
- **Advanced Technology:** Equipped with a transparent top lid for monitoring wash cycles and an LED digital display panel with electronic controls for simplified cycle selection and accurate timing.
- **Easy & Convenient Operation:** Features a user-friendly interface with one-touch start and various automatic wash cycles.
- **Top Loading Access:** Provides convenient access for loading and unloading laundry into the stainless steel water basin.
- **Low Noise Operation:** Operates at less than 72dB, ensuring a quieter washing experience.
- **Multiple Wash Cycles:** Includes 6 fully automatic wash cycles: Normal, Quick, Cotton, Jeans, Anti-Wrinkle, and Air Dry.
- **Water Level Options:** Offers 6 water level options to optimize water usage based on load size.
- **Delay Start:** Provides added convenience for scheduling wash cycles.
- **Pulsator Action:** Generates strong and weak water flows for effective and even washing.

SETUP AND INSTALLATION

1. Unpacking

- Carefully remove the washer from its packaging. It is recommended to have two people for lifting due to its weight (approx. 100 lbs).
- Inspect the unit for any shipping damage. Report any damage to your retailer immediately.
- Remove all packing materials, including the base packaging and any internal protective inserts from the drum.

2. Placement

- Place the washer on a firm, level surface to minimize vibration and noise during operation.
- Ensure adequate clearance around the washer for ventilation and ease of use.
- The unit is portable and equipped with wheels for easy movement.

3. Water Connection

- Connect the water inlet hose(s) to a cold water faucet. If your model supports hot water, connect both hot and cold lines.
- Ensure all connections are tight to prevent leaks.
- The washer comes with a quick connect attachment for easy faucet hookup.

4. Drain Hose Setup

- Position the drain hose into a sink or laundry tub. Ensure the hose is secured to prevent it from dislodging during the drain cycle.
- The drain hose must be positioned above the water level in the tub to prevent continuous draining.

5. Power Connection

- Plug the power cord into a grounded electrical outlet.

OPERATING INSTRUCTIONS

1. Loading Laundry

- Open the top-loading lid.

- Distribute laundry evenly around the pulsator in the stainless steel tub. Do not overload the washer.

Figure 4: Loading laundry into the top-access tub.

2. Adding Detergent

- Add the recommended amount of detergent directly into the tub with the clothes.
- For liquid detergent, pour it onto the clothes under the water spout.

3. Selecting Wash Cycle and Settings

- Press the "On/Off" button to power on the washer.
- Use the "Program" button to select one of the 6 automatic wash cycles: Normal, Quick, Cotton, Jeans, Anti-Wrinkle, or Air Dry.
- Adjust the water level using the "Load/Size" button (6 options available).
- Optionally, use the "Delay" button to set a delayed start time.
- Ensure the lid is closed before starting a cycle.

4. Starting the Wash

- Press the "Start/Pause" button to begin the selected wash cycle.
- The LED display will show the remaining wash cycle time.

5. After the Cycle

- The washer will signal when the cycle is complete.
- Remove laundry promptly to prevent wrinkles.
- Turn off the water supply and unplug the washer when not in use.

MAINTENANCE AND CARE

1. Cleaning the Exterior

- Wipe the exterior surfaces with a soft, damp cloth. Avoid abrasive cleaners.

2. Cleaning the Interior (Tub)

- Periodically run a clean cycle with hot water and a washer cleaner or white vinegar to remove detergent residue and odors.
- Leave the lid open after use to allow the tub to air dry and prevent mildew.

Figure 5: The stainless steel tub, designed for durability and easy cleaning.

3. Water Inlet Filter

- Check and clean the water inlet filter periodically to prevent blockages and ensure proper water flow.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Washer does not start	Power cord unplugged; Lid not closed properly; Water supply off.	Ensure power cord is securely plugged in. Close the lid completely. Turn on water supply.
Water leaks	Loose hose connections; Drain hose not secured.	Tighten all water inlet hose connections. Secure the drain hose properly in the sink or tub.
Excessive vibration/noise	Washer not level; Load unbalanced.	Ensure the washer is on a level surface. Redistribute laundry evenly inside the tub.
Clothes still wet after spin cycle	Overloaded; Unbalanced load; Drain hose issue.	Reduce load size. Redistribute clothes. Check if drain hose is kinked or blocked.
