Smatree Flexible Jaws Clamp Mount Instruction Manual

Model: EU-Smatree0014

INTRODUCTION

Thank you for choosing the Smatree Flexible Jaws Clamp Mount. This product is designed to provide versatile mounting options for your action cameras, webcams, and compact digital cameras. Its flexible gooseneck arm and strong clamp allow for secure attachment to various surfaces, enabling diverse shooting angles and stable positioning. Please read this manual carefully before use to ensure proper operation and longevity of your device.

SETUP INSTRUCTIONS

1. **Unpack the Mount:** Carefully remove all components from the packaging. Ensure you have the flexible jaws clamp mount and any included adapters.
2. **Attach Your Device:**
 - For cameras with a 1/4-inch tripod thread: Screw the camera directly onto the 1/4-inch screw at the end of the gooseneck arm.
 - For GoPro or similar action cameras: Attach your action camera to the included GoPro-style mount adapter, then connect the adapter to the 1/4-inch screw on the gooseneck arm.

Image: Diagram illustrating the 1/4-inch thread compatibility with various compact cameras, webcams, and GoPro cameras.

- Clamp the Mount:** Identify a stable surface for clamping. The clamp opens up to 1.8 inches (4.5 cm) wide. Press the clamp handles together to open the jaws and secure it firmly to a desk, shelf, pipe, or other suitable object. The heavy-duty rubber lines inside the clamp provide anti-slip grip.

Image: Close-up views highlighting the 360-degree rotation, double stainless spring for stronger clamping, 1.8-inch maximum clamp opening with heavy-duty rubber lines, and arbitrary bending capability of the gooseneck.

- 4. Adjust the Gooseneck Arm:** The flexible arm can be bent and positioned to achieve your desired height and angle. The maximum extension of the arm is 12 inches (30.5 cm).

Image: The Smatree Jaws Clamp Mount in its fully extended and bent configurations, indicating a maximum extension of 12 inches (30.5 cm).

OPERATING INSTRUCTIONS

Once the mount is securely attached and your device is in place, you can fine-tune its position:

- **Angle Adjustment:** The flexible tripod head at the end of the gooseneck arm allows for 360-degree rotation, enabling you to capture footage or stream from virtually any angle.
- **Positioning the Flexible Arm:** Gently bend and twist the gooseneck arm to achieve the desired height and distance from your subject. The arm is designed to hold its position once set.
- **Important Usage Note:** For optimal stability and to prevent camera shake, it is recommended to mount the Smatree Flexible Jaws Clamp Support on a non-moving object. Avoid mounting it on surfaces that vibrate or are unstable.

MAINTENANCE

- **Cleaning:** Wipe the mount with a soft, dry cloth to remove dust and dirt. For stubborn grime, a slightly damp cloth can be used, followed by immediate drying. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the mount in a cool, dry place away from direct sunlight and extreme temperatures. Ensure the gooseneck arm is not bent into extreme positions for prolonged periods during storage to maintain its flexibility.
- **Inspection:** Periodically check the clamp springs and screw threads for any signs of wear or damage. Ensure all connections are secure before each use.

TROUBLESHOOTING

- **Mount is not stable:**
 - Ensure the clamp is fully engaged and securely tightened onto a stable, non-vibrating surface.
 - Verify that the surface material is suitable for clamping and provides adequate grip.
 - Check that your camera or device is properly attached to the 1/4-inch screw or GoPro adapter.
- **Gooseneck arm sags or does not hold position:**
 - Ensure the weight of the attached device does not exceed the mount's capacity.
 - Reposition the gooseneck arm to distribute the weight more evenly or reduce leverage.
 - Avoid over-extending the arm horizontally with heavy devices.
- **Device connection feels loose:**
 - Tighten the 1/4-inch screw connection to your camera.
 - If using a GoPro adapter, ensure the thumb screw is fully tightened.

SPECIFICATIONS

| Feature | Detail |
|-------------------------|---|
| Brand | Smatree |
| Model Number | EU-Smatree0014 |
| UPC | 605683348809 |
| Color | Black |
| Material | Metal, Durable Plastic |
| Mounting Type | Clamp |
| Special Features | Rotatable, Flexible Gooseneck |
| Max Clamp Opening | 1.8 inches (4.5 cm) |
| Max Gooseneck Extension | 12 inches (30.5 cm) |
