UGREEN 10351

UGREEN USB Printer Cable User Manual

Model: 10351

Introduction

This manual provides essential information for the proper use and maintenance of your UGREEN USB Printer Cable. This cable facilitates high-speed data transfer between USB-A enabled devices and USB-B enabled peripherals.

Setup Instructions

The UGREEN USB Printer Cable is designed for plug-and-play functionality, requiring no additional driver installation for most operating systems.

1. **Identify Connectors:** Locate the USB-A connector (flat, rectangular) and the USB-B connector (square with two chamfered corners).
2. **Connect to Host Device:** Insert the USB-A connector into an available USB port on your computer, laptop, or other USB-A enabled host device.
3. **Connect to Peripheral:** Insert the USB-B connector into the corresponding USB-B port on your printer, scanner, MIDI keyboard, digital piano, DAC, or other compatible peripheral.
4. **Verify Connection:** Ensure both connectors are securely seated. Your operating system should automatically detect the connected

peripheral.

Operating Instructions

Once connected, the UGREEN USB Printer Cable facilitates stable and high-speed data transfer between your devices.

Data Transfer

- The cable supports data transfer speeds up to 480 Mbps for USB 2.0 devices. It is backward compatible with USB 1.1 (12 Mbps) and USB 1.0 (1.5 Mbps).
- For printing or scanning, initiate the operation from your computer's software or the peripheral's control panel.
- For MIDI devices, ensure your music software recognizes the connected instrument.

Stable Connection

This cable provides a more stable and reliable connection compared to wireless alternatives, minimizing signal loss and ensuring clear data transmission.

Image: A comparison showing an unstable wireless connection (laptop to printer via Wi-Fi) with distorted images, versus a stable wired connection (laptop to printer via UGREEN USB cable) with clear images, highlighting the reliability of a wired connection.

Care and Maintenance

- **Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tightly coiling the cable to prevent internal damage.
- **Cleaning:** Use a soft, dry cloth to gently wipe the cable and connectors. Do not use liquid cleaners or solvents.
- **Handling:** Always grasp the connector head when plugging or unplugging the cable. Avoid pulling directly on the cable itself, as this can damage the internal wires and connectors.
- **Durability:** The cable features corrosion-resistant gold-plated connectors and a durable PVC jacket designed for long-term performance and resistance to bending.

Troubleshooting

Problem	Possible Cause	Solution
Device not recognized	Loose connection, incorrect port, or driver issue.	• Ensure both ends of the cable are securely plugged in. • Try a different USB port on your computer. • Verify the peripheral is powered on. • Restart your computer and the peripheral. • Check the peripheral's manufacturer website for specific driver requirements (though this cable is plug-and-play, some peripherals may require drivers).
Slow data transfer	Connecting to a USB 1.0/1.1 port, or a faulty cable.	• Ensure you are connecting to a USB 2.0 compatible port on your computer for optimal speeds. • Test with another USB 2.0 cable if available to rule out cable fault.
Intermittent connection/signal loss	Damaged cable, interference, or power issues.	• Inspect the cable for any visible damage (kinks, cuts). • Ensure the peripheral has adequate power. • Avoid placing the cable near strong electromagnetic interference sources.

Specifications

Feature	Detail

Feature	Detail
Brand	UGREEN
Model Number	10351
Connector Type	USB Type A Male to USB Type B Male
Cable Type	USB 2.0
Data Transfer Rate	Up to 480 Mbps (USB 2.0)
Backward Compatibility	USB 1.1 (12 Mbps), USB 1.0 (1.5 Mbps)
Compatible Devices	Printers (HP, Canon, Brother, Samsung, Dell, Epson, Lexmark, Xerox), Scanners, Servers, Hard Drives, Cameras, Pianos, DACs, MIDI Keyboards
Connector Material	Gold-plated
Outer Material	Polyvinyl Chloride (PVC)
Color	Black
Length	10 FT (3 meters)
Plug and Play	Yes, no driver required for most systems.

Warranty and Support

For warranty information and customer support, please refer to the official UGREEN website or contact their customer service directly. Details are typically provided with your product packaging or on the manufacturer's official support pages.
