

## Girmi CE85

# Girmi CE85 Slow Juicer Instruction Manual

Model: CE85

## 1. INTRODUCTION

Thank you for purchasing the Girmi CE85 Slow Juicer. This appliance is designed to efficiently extract juice from various fruits and vegetables, providing fresh and nutritious beverages. Please read this instruction manual carefully before using the appliance to ensure safe and optimal operation. Keep this manual for future reference.

The Girmi CE85 features a durable stainless steel construction, a 1-liter juice container capacity, and a powerful 400W motor. Its slow juicing technology is designed for efficient extraction, and the reverse function, along with the included cleaning brush, simplifies maintenance.

## 2. IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before use.
- Ensure the voltage indicated on the appliance corresponds to your local mains voltage before connecting.
- Do not immerse the motor base in water or any other liquid.
- Keep hands and utensils out of the feeding chute during operation to prevent injury and damage to the appliance. Use the food pusher provided.
- Unplug from the outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- This appliance is for household use only. Do not use outdoors.
- Children should be supervised to ensure that they do not play with the appliance.
- Do not attempt to repair the appliance yourself. Contact qualified service personnel for repairs.

## 3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your Girmi CE85 Slow Juicer:

1. Food Pusher
2. Feeding Chute
3. Top Cover
4. Auger (Squeezing Screw)
5. Filter Basket (Stainless Steel)
6. Juicing Bowl (Clear)
7. Pulp Outlet
8. Juice Outlet with Cap
9. Motor Base with Control Knob (Off/On/Reverse)
10. Juice Container (1 Liter)
11. Pulp Container (1 Liter)
12. Cleaning Brush

**Figure 1:** Fully assembled Girmi CE85 Slow Juicer. The image displays the silver base unit with a control knob, a clear juicing chamber, a stainless steel filter, and a black top assembly including the feeding chute and pusher. A transparent pulp outlet is visible on the side.

## 4. SETUP AND ASSEMBLY

Before first use, wash all removable parts (except the motor base) in warm, soapy water, rinse thoroughly, and dry. Ensure all parts are completely dry before assembly.

1. Place the motor base on a stable, flat, and dry surface.
2. Align the juicing bowl with the motor base and rotate it clockwise until it locks securely into place.
3. Insert the filter basket into the juicing bowl, ensuring it sits firmly.
4. Place the auger (squeezing screw) into the center of the filter basket.
5. Attach the top cover, aligning the marks on the cover with those on the juicing bowl, and rotate clockwise until it locks.
6. Position the juice container under the juice outlet and the pulp container under the pulp outlet.

## 5. OPERATING INSTRUCTIONS

Follow these steps for optimal juicing:

1. Prepare your ingredients: Wash fruits and vegetables thoroughly. Cut them into pieces small enough to fit into the feeding chute. Remove any hard seeds, pits, or thick peels (e.g., citrus peels).

2. Ensure the juice and pulp containers are in place.
3. Plug the appliance into a suitable power outlet.
4. Turn the control knob to the "On" position. The auger will begin to rotate.
5. Gradually feed the prepared ingredients into the feeding chute. Use the food pusher to gently guide the ingredients down. **Do not force ingredients**, as this can strain the motor.
6. The juicer will separate the juice from the pulp. Fresh juice will flow into the juice container, and pulp will be expelled into the pulp container.
7. Once juicing is complete, turn the control knob to the "Off" position and unplug the appliance.
8. **Reverse Function:** If ingredients become jammed during operation, turn the control knob to the "R" (Reverse) position for a few seconds. This will rotate the auger in the opposite direction to clear the blockage. Then, switch back to "Off" and then "On" to resume juicing.

## 6. MAINTENANCE AND CLEANING

---

Regular cleaning ensures the longevity and hygiene of your juicer.

1. **Immediate Cleaning:** After each use, turn off and unplug the juicer.
2. Disassemble the juicer by reversing the assembly steps.
3. Rinse all removable parts (top cover, auger, filter basket, juicing bowl, juice/pulp containers, food pusher) under running water to remove large pulp residues.
4. **Hand Wash Only:** Wash these parts with warm, soapy water using the provided cleaning brush to thoroughly clean the filter basket and other components. The cleaning brush is particularly useful for removing pulp from the fine mesh of the filter.
5. Rinse all parts thoroughly and allow them to air dry completely before reassembling or storing.
6. **Motor Base:** Wipe the motor base with a damp cloth. Never immerse the motor base in water or place it under running water.
7. Store the assembled or disassembled juicer in a clean, dry place.

## 7. TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in; parts not assembled correctly.	Ensure the power cord is securely plugged in. Check that all parts are correctly assembled and locked into place.
Motor stops during operation or struggles.	Too much produce fed at once; hard ingredients causing blockage.	Turn off the juicer. Use the "R" (Reverse) function for a few seconds to clear blockages. Reduce the amount of produce fed at one time. Cut hard ingredients into smaller pieces.
Excessive pulp in juice.	Filter basket is clogged or damaged.	Clean the filter basket thoroughly. Ensure it is free of pulp residue. If damaged, replace the filter basket.

Problem	Possible Cause	Solution
Leaking from the juicer.	Parts not assembled correctly; seals not properly seated.	Disassemble and reassemble all parts, ensuring they are securely locked. Check rubber seals for proper placement and damage.

## 8. SPECIFICATIONS

<b>Brand</b>	Girmi
<b>Model Name</b>	CE85
<b>Power</b>	400 Watts
<b>Voltage</b>	230 Volts
<b>Capacity (Juice Container)</b>	1 Liter
<b>Material</b>	Stainless Steel (Finish Type), Stainless Steel (Blade Material)
<b>Color</b>	Silver
<b>Product Dimensions (L x W x H)</b>	13.39 x 10.63 x 15.75 inches
<b>Item Weight</b>	9.24 pounds
<b>Recommended Uses</b>	Leafy greens, Citrus fruits, Hard vegetables
<b>Care Instructions</b>	Hand Wash Only

## 9. WARRANTY AND SUPPORT

Girmi products are manufactured to high-quality standards. For information regarding warranty coverage, please refer to the warranty card included with your purchase or contact Girmi customer support directly. Keep your proof of purchase for any warranty claims.

For technical assistance, spare parts, or general inquiries, please visit the official Girmi website or contact their customer service department. Contact details can typically be found on the product packaging or the official brand website.

**CE85 SLOW JUICER**

**DESCRIPTION**  
Do you like to taste your juice without lumps and pulp? With the extractor Girmi CE85, you can get healthy and nutritious fruit and vegetable juices, rich in vitamins, fiber and nutrients, with the action of slow juicing, rather than crushing food that occurs with conventional juicers. The Girmi CE85 Slow Juicer is a compact and elegant machine that produces a smooth and velvety. Very easy to clean and disassemble, equipped with a safety system that requires that all parts are correctly assembled before starting the machine. The Girmi CE85 Slow Juicer has a safety system that stops the machine if the system overheats protection which however works in a very silent way and it comes with a 2 liter container for juice and water and a recipe handbook.

**TECHNICAL FEATURES**
