IKEA 701.860.90

IKEA Microwave Lid

MODEL: 701.860.90

Introduction

This manual provides essential information for the safe and effective use of your IKEA Microwave Lid, Model 701.860.90. Please read these instructions carefully before first use and retain for future reference.

Product Overview

The IKEA Microwave Lid is designed to cover food during microwave heating, preventing splatters and helping to retain moisture for even heating. It features small holes for steam release and is suitable for most microwave ovens.

Safety Information

Important Safeguards

- Always ensure the lid is placed securely over the food container before microwaving.
- Do not use the lid in conventional ovens, on stovetops, or under a grill/broiler.
- Avoid using the lid with foods that contain high sugar or fat content for extended periods, as this may cause localized overheating and damage.
- The lid is designed to withstand temperatures up to 212°F (100°C). Exceeding this temperature may cause damage or warping.
- Always handle the lid with care after microwaving, as it may be hot.
- Keep out of reach of children.

Setup

First Use

- Before first use, wash the microwave lid thoroughly with warm water and mild detergent. Rinse and dry completely.

Operating Instructions

Using Your Microwave Lid

- Place your food in a microwave-safe dish or bowl.
- Position the IKEA Microwave Lid directly over the dish, ensuring it covers the food completely. The lid's design allows it to fit most plates and bowls.
- Place the covered dish into the microwave oven.
- Heat food according to your microwave's instructions and food requirements. The small holes in the lid will release steam during heating.
- After heating, carefully remove the lid using the rim to avoid direct contact with hot steam.

Care and Maintenance

Cleaning Your Lid

- The IKEA Microwave Lid is dishwasher-safe for convenient cleaning.
- Alternatively, wash by hand with warm, soapy water. Rinse thoroughly and dry.
- For stubborn food residue, soak the lid in warm, soapy water before cleaning.

Storage

- Store the lid in a clean, dry place when not in use.

Troubleshooting

Common Issues

- **Food not heating evenly:** Ensure the lid is centered over the food and that the food portion is appropriate for your microwave's power. Stirring food halfway through heating can also help.
- **Lid appears warped or damaged:** Discontinue use if the lid shows signs of significant warping, melting, or cracking. This may indicate exposure to excessive heat or improper use.

- **Splatter still occurring:** While designed to minimize splatter, very high-power settings or certain foods can still cause some. Ensure the lid is correctly positioned and consider reducing microwave power or heating time.

Specifications

Feature	Detail
Model Number	701.860.90
Brand	IKEA
Material	Polypropylene Plastic
Color	Gray Blue
Diameter	10 inches (25 cm)
Height	4 inches (10 cm)
Temperature Resistance	Up to 212°F (100°C)
Dishwasher Safe	Yes
Microwave Safe	Yes
Recyclable	Material may be recyclable (check local regulations)
