6. Troubleshooting

This section addresses common questions or issues you might encounter with your storage bin.

Problem	Possible Cause	Solution
Bin does not slide easily on carpet.	The fabric bottom may create friction with carpet fibers.	Consider placing the bin on a hard floor surface or a small rug/mat that allows for easier movement. Avoid forcing the bin, which could damage the product or floor.
Bin appears misshapen or not fully rigid.	Internal paperboard lining may not be fully extended.	Ensure all internal paperboard panels are fully unfolded and pressed against the fabric sides to provide maximum rigidity.
Unpleasant odor from the bin.	New product odor or items stored inside are damp.	Allow the bin to air out in a well-ventilated area for 24-48 hours before first use. Ensure all items placed inside are completely dry.
