

Turtle Wax T-75A

Turtle Wax T75A Zuo Wash Wax User Manual

Model: T-75A

1. INTRODUCTION

This manual provides instructions for the proper use of Turtle Wax T75A Zuo Wash Wax. This product is designed to clean your vehicle's exterior while simultaneously applying a protective wax layer, enhancing shine and water repellency.

2. SAFETY INFORMATION

- **Keep out of reach of children and pets.**
- Avoid contact with eyes. In case of contact, rinse thoroughly with water for several minutes. If irritation persists, seek medical attention.
- Do not ingest. If swallowed, do not induce vomiting. Call a poison control center or doctor immediately.
- Use in a well-ventilated area.
- Store in a cool, dry place, away from direct sunlight and extreme temperatures.
- Dispose of product and packaging according to local regulations.

3. PREPARATION

Before beginning the wash and wax process, ensure you have the following items:

- Turtle Wax T75A Zuo Wash Wax
- Two clean buckets (one for wash solution, one for rinsing mitt)
- Car wash mitt or sponge
- Hose with running water

- Clean microfiber drying towels

Park your vehicle in a shaded area to prevent premature drying of the wash solution, which can lead to water spots.

Rinse the entire vehicle thoroughly with water to remove loose dirt and debris. This helps prevent scratching during the washing process.

4. APPLICATION INSTRUCTIONS

Follow these steps for optimal cleaning and waxing results:

1. **Dilute the Wash Wax:** Pour 1 fluid ounce (approximately 30 ml) of Turtle Wax T75A Zuo Wash Wax into a clean bucket. Fill the bucket with 1 gallon (approximately 3.8 liters) of water. Agitate the mixture to create suds.
2. **Wash the Vehicle:** Dip your car wash mitt into the wash solution. Starting from the top of the vehicle and working downwards, gently wash one section at a time. Use a separate bucket of clean water to rinse your mitt frequently to avoid transferring dirt back onto the vehicle.
3. **Rinse Thoroughly:** After washing a section, immediately rinse it with clean water from your hose. Do not allow the wash solution to dry on the vehicle's surface.
4. **Complete Washing:** Continue washing and rinsing section by section until the entire vehicle is clean.
5. **Final Rinse:** Perform a final rinse of the entire vehicle to ensure all soap residue is removed.
6. **Dry the Vehicle:** Immediately dry the vehicle using clean microfiber drying towels to prevent water spots and enhance the wax's shine.

5. MAINTENANCE

Regular use of Turtle Wax T75A Zuo Wash Wax helps maintain your vehicle's finish. For best results, wash your vehicle every 2-4 weeks, or as needed, depending on environmental conditions and usage. To prolong the life of your vehicle's paint and the wax protection, avoid harsh detergents or abrasive cleaning tools between washes.

6. TROUBLESHOOTING

- **Streaking or Hazy Finish:** This can occur if the product dries on the surface before rinsing, or if not thoroughly rinsed. Ensure you wash and rinse one section at a time and dry immediately. Re-wash affected areas if necessary.
- **Poor Sudsing:** Ensure the product is properly diluted according to instructions. Hard water can sometimes reduce sudsing, but it does not affect cleaning performance.

7. SPECIFICATIONS

Brand	Turtle Wax
Model Number	T-75A
Item Form	Fluid
Specific Uses	Vehicle Wash and Wax
Item Weight	1.5 Pounds (approx. 0.68 kg)
Unit Count	16.00 Fluid Ounces (approx. 473 ml)
UPC	074660111758
