MAINTENANCE

To maintain the appearance and longevity of your bunk bed, follow these care instructions:

- **Cleaning:** Clean the wood surfaces using a damp cloth.
- **Avoid Chemicals:** Do not use strong chemicals or abrasive cleaners, as these can damage the finish.
- **Regular Checks:** Periodically check all bolts and connections to ensure they remain tight. Retighten as necessary to prevent wobbling or instability.

TROUBLESHOOTING

If you encounter issues with your bunk bed, consider the following common solutions:

- **Missing or Damaged Hardware:** If parts are missing or damaged upon arrival, contact customer support immediately for replacements.

- **Wood Splitting During Assembly:** Ensure not to overtighten bolts. If bolts are too long for a specific connection, consider adding washers to prevent them from protruding and splitting the wood.
- **Trundle/Drawer Issues:** If the trundle or drawers do not slide smoothly, check the alignment of the rails and ensure all screws are properly seated. Reinforce areas if necessary, especially for the trundle wheels or mattress support, as these can experience wear over time.
- **Instability/Wobbling:** Re-check all connections and tighten any loose bolts. Ensure the bed is on a level surface.
