Maintenance

To ensure the longevity and continued performance of your Zinus Smartbase bed frame, follow these simple maintenance guidelines:

- **Regular Cleaning:** Wipe the metal frame with a soft, damp cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Check Connections:** Periodically inspect all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain stability.
- **Avoid Overloading:** Do not exceed the recommended maximum weight capacity of 340 kg (750 lbs) for the individual size frame.

Troubleshooting

If you encounter any issues with your Zinus Smartbase bed frame, refer to the following common solutions:

- **Instability or Wobbling:** Ensure all assembly instructions were followed correctly. Check and tighten all bolts and connections. Uneven flooring can also cause wobbling; try repositioning the frame or using shims if necessary.
- **Mattress Slipping:** Some mattresses may slide on the smooth steel slats. To prevent this, consider placing anti-slip foam or a non-slip mat between the mattress and the bed frame slats.
- **Noise:** If the frame makes noise, re-check all connections for tightness. Loose bolts are a common cause of creaking. Ensure the frame is on a level surface.
- **Damaged Parts:** If any part is damaged or missing upon arrival, do not proceed with assembly. Contact customer support for assistance.

Safety Precaution: Always ensure correct assembly to prevent instability or collapse. Pay attention to any sharp edges during handling and assembly.
