4. SETUP AND ASSEMBLY INSTRUCTIONS

The Zinus SmartBase is designed for easy assembly. Follow these steps carefully:

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a clean, soft surface (e.g., carpet) to prevent scratches.
2. **Unfold Frame Sections:** The bed frame typically comes in two or more folded sections. Carefully unfold each section until it lies flat.
3. **Connect Frame Sections:** Align the connecting points of the frame sections. Use the provided bolts and the Allen wrench to securely fasten the sections together. Ensure all connections are tight.
4. **Secure Support Legs:** Ensure all support legs are fully extended and locked into place. Some models may have folding legs that click into position.
5. **Final Check:** Once assembled, gently shake the frame to ensure all connections are secure and the frame is stable.

Once assembled, the SmartBase is ready for use.

- **Mattress Placement:** Carefully place your mattress directly onto the assembled frame. The SmartBase eliminates the need for a box spring.
- **Under-Bed Storage:** The frame provides approximately 12.5 inches of clearance, offering valuable space for under-bed storage. Utilize storage bins or containers to organize items.
- **Headboard Attachment (Optional):** If you wish to attach a headboard, Zinus SmartBase headboard brackets (sold separately) are required. Follow the instructions provided with the headboard brackets for proper installation.

6. MAINTENANCE

Regular maintenance ensures the longevity and performance of your bed frame.

- **Cleaning:** Wipe the frame with a dry cloth as needed to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners.
- **Check Connections:** Periodically inspect all bolts and connections to ensure they remain tight. Re-tighten if necessary.
- **Weight Distribution:** Distribute weight evenly across the frame to prevent undue stress on specific areas.

7. TROUBLESHOOTING

If you encounter any issues with your SmartBase, refer to the following common solutions:

- **Squeaking Noises:** If the frame squeaks, check all bolts and connections. Tighten any loose fasteners. Ensure the frame is on a level surface.
- **Mattress Slipping:** Some mattresses may slide on the smooth metal surface. Consider placing an anti-slip mat or rubber grippers between the mattress and the frame to prevent movement.
- **Instability:** If the frame feels unstable, re-verify that all sections are correctly connected and all legs are fully extended and locked. Ensure the frame is placed on a flat, even floor.
