**HQRP 887774401081517**

# HQRP 10ft AC Power Cord User Manual

Model: 887774401081517

## INTRODUCTION

---

This manual provides essential information for the safe and effective use of your HQRP 10ft AC Power Cord. This power cord is designed to provide reliable power connectivity for various electronic devices, including HDTVs, LCDs, LED TVs, and Plasma TVs, specifically compatible with RCA F20706FT, F25150WN, F25151GG, F25163, F25163WN, and F25165GG models.

## SETUP AND CONNECTION

The HQRP AC Power Cord features an IEC C17 type connector on one end and a NEMA 1-15P plug on the other, ensuring broad compatibility with specified devices.

1. **Identify the Power Input:** Locate the power input port on your device (e.g., HDTV, LCD TV). This port is typically a two-pin receptacle designed for an IEC C17 connector.
2. **Connect to Device:** Insert the IEC C17 end of the HQRP power cord firmly into the power input port of your device. Ensure a snug fit to prevent accidental disconnections.
3. **Connect to Power Outlet:** Insert the NEMA 1-15P plug end of the power cord into a standard 120V AC wall outlet. Ensure the outlet is easily accessible and not overloaded.
4. **Verify Connection:** Once both ends are connected, ensure the device powers on correctly. If not, recheck connections and the power outlet.

## OPERATING INSTRUCTIONS

This power cord is designed for straightforward operation. Once connected as described in the "Setup and Connection" section, it provides continuous power to your compatible device.

- Ensure the power cord is not kinked, pinched, or placed under heavy objects, as this can damage the internal wiring.
- Avoid pulling the cord by the cable itself when disconnecting; always grasp the plug firmly.
- Do not use the power cord if it shows any signs of damage, such as frayed wires, exposed conductors, or damaged insulation.

## MAINTENANCE AND CARE

Proper care extends the life of your power cord and ensures safe operation.

- **Cleaning:** Disconnect the power cord from both the device and the wall outlet before cleaning. Wipe the cord with a dry, soft cloth. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use, coil the power cord loosely. Avoid tight coiling or bending at sharp angles, which can stress the internal wires. Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect the entire length of the cord, including the plugs, for any signs of wear, cuts, or damage. Replace the cord immediately if any damage is observed.

## TROUBLESHOOTING

If you encounter issues with your power cord, consider the following common solutions:

Problem	Possible Cause	Solution
Device does not power on.	Cord not fully inserted; power outlet issue; damaged cord.	Ensure both ends of the cord are fully inserted. Test the outlet with another device. Inspect the cord for damage; replace if necessary.
Intermittent power.	Loose connection; internal wire damage.	Ensure connections are secure. If the problem persists, the cord may be damaged internally and should be replaced.
Cord feels warm.	Overload; poor connection; internal damage.	Ensure the device's power requirements do not exceed the cord's capacity (125V, 15A). Check connections. Discontinue use if cord becomes excessively hot and replace.

## SPECIFICATIONS

The HQRP 10ft AC Power Cord is engineered to meet specific performance and safety standards.

**Brand:** HQRP

**Model Number:** 887774401081517

**Length:** 10 feet (approx. 3 meters)

**Wire Size:** 18 AWG

**Connectors:** IEC C17 Type to NEMA 1-15P

**Color:** Black

**UL Listed:** Yes

**Item Weight:** 12 ounces

**Compatibility:** RCA F20706FT, F25150WN, F25151GG, F25163, F25163WN, F25165GG HDTV TV LCD LED Plasma
