Operating

- **Display:** When not in use, the model can be displayed on a shelf or in a display case to showcase its intricate details.

Maintenance

Proper maintenance will help preserve the appearance and functionality of your die-cast model.

- **Cleaning:** To clean the model, gently wipe it with a soft, dry cloth. For stubborn dust, a slightly damp cloth can be

used, followed immediately by a dry cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive water, as these can damage the paint or plastic components.

- **Storage:** Store the model in a cool, dry place away from direct sunlight, extreme temperatures, and high humidity. Prolonged exposure to these conditions can cause discoloration or material degradation.

Troubleshooting

Due to the simple, non-electronic nature of this die-cast model, troubleshooting is generally minimal.

- **Wheels Not Turning Smoothly:** Check for any debris or foreign objects lodged in the wheel axles. Gently remove any obstructions. If the issue persists, the axle may be bent or damaged, which may require professional repair or replacement.
