## 4. MAINTENANCE

---

Proper care will preserve the appearance and functionality of your diecast model.

- **Cleaning:** Use a soft, dry cloth to gently wipe dust from the model. For more stubborn dirt, a slightly damp cloth with plain water can be used, followed immediately by a dry cloth. Avoid abrasive cleaners or solvents, as these can damage the paint finish.
- **Handling:** Always handle the model by its main body. Avoid applying excessive force to delicate parts such as mirrors, spoilers, or opening mechanisms.
- **Storage:** Store the model away from direct sunlight, extreme temperatures, and high humidity to prevent fading or material degradation.

## 5. TROUBLESHOOTING

---

Most issues with diecast models are related to handling. Refer to the following for common concerns:

- **Stiff Moving Parts:** If doors, engine covers, or steering feel stiff, apply gentle, consistent pressure. Do not force them, as this may cause breakage. Over time, these parts may loosen slightly with careful use.

- **Scratches or Paint Chips:** Minor imperfections can sometimes be touched up with model-specific paint, though this is not officially recommended by the manufacturer. Preventative care is best.
- **Loose Wheels:** Ensure the model is placed on a flat surface. If a wheel appears loose, it may be due to the spring suspension system. If it detaches, it may be possible to reattach it if no parts are broken.
