Casio MTP-S100E-7BVCF

Casio MTP-S100E-7BVCF Solar Stainless Steel Watch User Manual

Model: MTP-S100E-7BVCF

INTRODUCTION

This manual provides essential instructions for the proper use and maintenance of your Casio MTP-S100E-7BVCF Solar Stainless Steel Watch. Please read this manual carefully to ensure optimal performance and longevity of your timepiece.

CASIO

SOLAR-POWERED
WR 50M

SETUP

Initial Charging

Your Casio MTP-S100E-7BVCF watch is equipped with a solar charging system. To ensure proper operation, expose the watch face to light for several hours before initial use. Direct sunlight is most effective, but fluorescent light can also charge the watch. Avoid covering the watch face when charging.

Setting the Time

1. Pull the crown out to the **second click**. The second hand will stop.
2. Rotate the crown to adjust the hour and minute hands to the correct time.
3. Push the crown back in to the normal position to start timekeeping.

Setting the Date

1. Pull the crown out to the **first click**.
2. Rotate the crown to adjust the date display.
3. Push the crown back in to the normal position.

Note: Avoid setting the date between 9:00 PM and 1:00 AM, as this may interfere with the automatic date change mechanism.

OPERATING YOUR WATCH

Timekeeping

The watch displays hours, minutes, and seconds. The solar power system continuously recharges the internal battery, ensuring consistent operation under normal light exposure.

Date Display

The date is displayed in a window at the 3 o'clock position. The date automatically advances once every 24 hours.

Water Resistance

This watch is water resistant to 50 meters (165 feet). This means it is suitable for short periods of recreational swimming, but not for diving or snorkeling. **Do not operate the crown while the watch is wet or submerged.**

Image of the Casio MTP-S100E-7BVCF watch worn on a wrist, demonstrating its size and fit. The silver stainless steel expansion band is visible.

Maintenance

Cleaning

Wipe the watch case and band with a soft, dry cloth. For stainless steel bands, a slightly damp cloth can be used, followed by a dry cloth. Avoid using chemical cleaners or abrasive materials.

Charging Guidelines

Regularly expose the watch to light to maintain its charge. If the watch is stored in darkness for extended periods, it may stop operating. Place it in a well-lit area to resume operation. Avoid exposing the watch to extremely high temperatures during charging.

Battery Information

The watch uses a rechargeable battery that is charged by solar power. Under normal use and proper light exposure, battery replacement is not required.

Troubleshooting

Watch Not Running

- **Cause:** Insufficient charge.
- **Solution:** Expose the watch to bright light for several hours to recharge the battery.

Incorrect Time or Date

- **Cause:** Time or date was not set correctly, or crown was accidentally pulled.
- **Solution:** Refer to the "Setting the Time" and "Setting the Date" sections to readjust.

Condensation Inside Watch

- **Cause:** Exposure to sudden temperature changes or compromised water resistance.
- **Solution:** If condensation persists, it may indicate a seal issue. Contact an authorized service center for inspection.

Specifications

General

- **Model Number:** MTP-S100E-7BVCF
- **Brand:** Casio
- **Movement:** Quartz (Solar Powered)
- **Water Resistance:** 50 meters (165 feet)
- **Case Material:** Stainless Steel
